Note on Citations in this Chronology

Citations appear at the end of each entry in the Long-Form Version of this *Chronology* (vols. 2-5) and refer to a variety of sources available to the Committees. These sources are noted in the corresponding entries in the Summary Version (vol. 1) only by the witness' name or by the document description or its exhibit number. The sources include:

1. JHICI. Refers to the unpublished transcripts, titled Joint Hearings on the Iran-Contra Investigation, that were issued daily to the Committees while the Iran-Contra Hearings were being held in May through August 1987. All page references given as "[Witness] Testim., JHICI" are to these volumes which are stored in the Committees' archives in Washington, D.C. These transcripts have recently been published by the Committees in a thirteen volume set titled *Iran-Contra Investigation: Joint Hearings Before the Senate Select Committee on Secret Military Assistance to Iran and the Nicaraguan Opposition and the House Select Committee to Investigate Covert Arms Transactions with Iran*, 100th Cong., 1st Sess. (Washington, D.C.: U.S. Government Printing Office, 1987-88). A table converting unpublished transcript (JHICI) page numbers to published transcript (referred to in the *Iran-Contra Report* as *Hearings* volumes) page numbers is included at the end of volume I of this Appendix.

2. Executive Session, JHICI. Refers to sworn hearing testimony of John Poindexter or Oliver North taken in closed session because of the classified nature of the testimony. (These witnesses also testified in sessions open to the public.) The transcripts of the closed sessions were publicly released after classified portions of the testimony were redacted. Citations to Executive Session testimony refer to the unpublished transcripts described in the preceding paragraph. These transcripts are available in the Committees' archives in Washington, D.C.

3. Dep. A sworn deposition taken in the presence of one or more Members of the Committees and/or counsel for the Committees, and counsel for the deponent. These deposition transcripts have been published as Appendix B to the *Iran-Contra Report*.

4. Int. An unsworn interview conducted by one or more Committee Members and/or Committee counsel, with counsel for the interviewee present if the interviewee wished.

5. Ex. An exhibit used during the Iran-Contra Hearings ("JHICI Ex.____") or during a deposition ("[Witness] Dep. Ex.____").

6. PROF Notes. Messages generated on a computer system used by the National Security Council staff.

7. Document letter and number codes. Source and document file codes for materials that have been assigned a Senate letter code and stamped page number. These materials are stored in the Committees' archives in Washington, D.C.

8. Iran-Contra Report. *Report of the Congressional Committees Investigating the Iran-Contra Affair With Supplemental, Minority, and Additional Views* (Washington, D.C.: U.S. Government Printing Office, Nov. 17, 1987).

9. Tower Report. *Report of the President's Special Review Board* (Washington, D.C.: U.S. Government Printing Office, Feb. 26, 1987).

10. HFAC, HPSCI, or SSCI. Testimony or statements made by witnesses before the House Foreign Affairs Committee, the House Permanent Select Committee on Intelligence, or the Senate Select Committee on Intelligence.

11. CRS. A numbered report issued by the Congressional Research Service of the Library of Congress.

Preface

This *Testimonial Chronology* records the events of the Iran-Contra Affair as recounted by the witnesses who testified before the Congressional Committees, and as disclosed in contemporaneous documents that the Committees gathered. It was prepared by the staff of the Senate Select Committee on Secret Military Assistance to Iran and the Nicaraguan Opposition as an Appendix to the *Report of the Congressional Committees Investigating the Iran-Contra Affair* (*Iran-Contra Report*). Although this *Testimonial Chronology* is published by the Senate Select Committee, it is based on the evidence gathered by the two Select Committees during their joint investigation.

This *Testimonial Chronology* aims to be thorough, without passing judgment or making editorial comment on the evidence it records. It is intended to serve as a research aid, pulling together the myriad events and disparate threads of the Iran-Contra Affair in the words of the participants themselves. Accordingly, where the evidence contains multiple or differing versions of the same events, the various accounts are summarized or quoted. In every instance, the Committee has attempted to provide an accurate, objective and succinct summary of what the witnesses and the documents actually said—and not how the Committees viewed this evidence. The Committees' subjective views and conclusions are set forth in their *Iran-Contra Report*.

This *Testimonial Chronology*, while comprehensive, is not all-inclusive. The two Congressional Committees gathered hundreds of thousands of documents and took numerous depositions, not all of which could be included here. The primary source material for this *Testimonial Chronology* is the testimony of the witnesses who appeared at the Joint Hearings. Deposition testimony also has been included where the deposition transcripts were released prior to the publication of the *Iran-Contra Report*, or where the deposition transcripts discuss events referred to in the *Iran-Contra Report* or in this *Testimonial Chronology*. The documents quoted or cited were introduced as exhibits during the Joint Hearings or otherwise relied upon in the *Iran-Contra Report*.

Transcript text quoted in this *Testimonial Chronology* is edited only by the use of ellipses (. . .) or by material added in brackets where necessary for clarification or completeness. Such editing has been minimal. Likewise, [sic] has been used sparingly, in recognition of the fact that witnesses gave their testimony orally, not in writing. With this in mind, [sic] has been utilized to note that a quotation which might otherwise appear mistaken is recorded accurately here. Also, where a document or testimony has been quoted inaccurately in

other testimony, the accurate text is added parenthetically after the [sic].

The Summary Version of this *Testimonial Chronology* serves as an extended Table of Contents for the Long-Form Version. The Summary Version identifies topic headings in the order in which they appear in the Long-Form Version, and notes the specific witnesses whose testimony is included under each topic, as well as the documents quoted or cited.

Chronology entries are designated by nine-digit index numbers in the left margin before each entry. This number gives the date of each event. For example, 85/11/15-100 means November 15, 1985 (or mid-November 1985). The last three digits after the hyphen (100) were solely for computer sorting purposes; they need not detain the reader.

The dates used are those furnished by the witnesses or the documents; however, certain major topics (*e.g.*, the "diversion") are grouped together for convenience.

Before this *Testimonial Chronology* was released, it was submitted by the Senate Select Committee to the White House for review by a Declassification Committee composed of representatives from the various executive departments. This is the same Declassification Committee which functioned throughout the Congressional investigation of the Iran-Contra Affair. The Senate Select Committee expresses its gratitude to the members of the Declassification Committee, and in particular, to Brenda Reger of the NSC staff, for their diligent work in reviewing this *Testimonial Chronology* and helping the Senate Select Committee insure that all critical evidence was disclosed with due regard for considerations of national security and U.S. foreign relations.

This *Testimonial Chronology* is largely the work of Isabel McGinty, Esq., an Assistant Counsel on the Senate Select Committee staff. Ms. McGinty spent enormous hours—including long days, long nights and weekends—throughout the past year to compile this *Testimonial Chronology* and prepare it for publication. Although the task was extremely difficult and painstaking, Ms. McGinty saw it through to completion, long after the *Iran-Contra Report* had been issued and other staff members had departed for their homes. The Senate Select Committee expresses special gratitude to Isabel McGinty for her dedicated service in producing these volumes.

It is the Senate Select Committee's hope that this *Testimonial Chronology* will contribute to the public's understanding of the complex events which made up the Iran-Contra Affair.

JOINT HEARINGS ON THE IRAN-CONTRA INVESTIGATION (JHICI)

85/11/23-300 FROM NOVEMBER 21 THROUGH DECEMBER 11, 1985			<p>THE 11/85 HAWK TRANSACTION: CIA INVOLVEMENT</p> <p>Clarridge sends or receives 80 separate cables to and from three locations. The cables instruct CIA officers at the locations to assist in obtaining landing rights on overflight clearances for the flights from Israel to Iran. The cables are sent through the privacy channel and headquarters does not maintain any regular file copies. The CIA officer in Country 15 later destroys his copies.</p> <p>The cables ultimately turn up only in Clarridge's personal files at the CIA. Two, at least, remain missing, however: (1) Clarridge's cable to the officer informing him of the reason he is to assist Secord in obtaining landing rights; and (2) the officer's cable to Clarridge informing him that Secord has said the flight involves HAWKS headed for Iran to get back U.S. hostages. (JHICI, 6/24/87, at 269-70 [Eggleston summary of cables and depositions].)</p>

Later that day, the European government informs the DCM that it has reached a decision, but requires a note stating the operation is for humanitarian reasons and is to free the U.S. hostages.</p> <p>Clarridge cables the CIA officer that on Poindexter's instruction, the European government should be informed that the U.S. Government</p>

NOVEMBER 24,			That day, the attempt to transship the missiles through that European country is abandoned. Clarridge, however, continues to try to obtain overflight clearances from another country for five flights into Iran. (JHICI, 6/24/87, at 270-71 [Eggleston summary of cables and depositions].)
1985			
			THE 11/85 HAWK TRANSACTION: OIL-DRILLING EQUIPMENT
			Clarridge instructs the senior CIA officer in a second country to inform that country that the overflight clearances involve planes bearing oil-drilling equipment.
			That evening, the first of the five projected HAWK shipments arrives in Tehran. The missiles are unloaded by the following day. (JHICI, 6/24/87, at 271 [Eggleston summary].)
			THE 11/85 HAWK TRANSACTION: DELIVERY AND FURTHER PROBLEMS
			NORTH ACCOUNT:
			North detailed the delivery of the initial shipment of HAWKs, at last, to Iran:
			"Mr. NIELDS. And can you tell us the story of why only 18 were shipped?
			"Mr. NORTH. It is a bit of a horror story. The original plan as had been worked out by the Israelis would have put, as I recall, either 40 or 80 on a 747 cargo jet and that would offload in the European country and reload onto other

He worked that out with the Israelis and only 18 could be put into the kind of aircraft that was provided, because apparently the configuration of the door--I defer to experts on loading airplanes for exactly what the problem was.</p> <p>"But it was, I think, a loading problem more than anything else. It only allowed 18 to be loaded at once.</p> <p>"Mr. NIELDS. That explains why only 18 went at one time. But why weren't the rest of them shipped later?</p> <p>"Mr. NORTH. To coin a phrase, I think the Iranians went ballistic when they saw what they got. The reason they did so is they had apparently been told by the Israelis that they were getting a system that would shoot down Soviet and Iraqi high-altitude aircraft, and the Hawk system is not a high-altitude weapons system, it is a low-altitude, defensive weapons system. And apparently they felt that they had been misled.</p> <p>"Now, having not been a party to whatever the Iranians were told, either by Mr. Ghorbanifar or Mr. Nimrodi or Mr. Schwimmer, General Secord was obviously concerned that someone had misled the Iranians at the far end and they were very upset. I mean, we could see that They apparently disassembled one of the 18 Hawks, noticed that it did not meet what they had--in fact, it was the same as what they already had in their inventory</p>

from the United States, and were very, very concerned.

"We became concerned at that point, or at least I did, that because of the commitments that had been made for something other than what was delivered, that we were indeed, instead of rescuing hostages, creating a situation in which they were being placed at increasing risk because of potential reprisals or something like that.

"And at that point in time, a proposal was developed by which we would take these activities and exert more control over them and management over them. You just couldn't have people making commitments for American lives in faraway places and creating a situation where those who were supposedly helping to influence their release would think we were being--cheating on them was the word that was used frequently" (North Testim., JHICI, 7/7/87, at 137-39.)

THE 11/85 HAWK TRANSACTION: SECORD INVOLVEMENT
SECORD ACCOUNT:

A problem arises after the first 18 (out of a shipment of 80) I-HAWKS are sent to Iran from Israel. At North's request, Secord travels to Israel from the European country where Secord has been coordinating transportation of the I-HAWKS.

Secord meets with David Kimche, the Director General of the Israeli Foreign Ministry. Kimche sends Secord to talk with Al Schwimmer. Schwimmer says that he, along with Yaakov Nimrodi, has been dealing with Manucher Ghorbanifar. Schwimmer says he has also had meetings about the transactions

with Michael Ledeen. Secord learns from Schwimmer that the Iranians sought missiles with high-altitude capability. The I-HAWK, Secord tells Schwimmer, "is designed specifically for low altitude aircraft." The Iranians have ordered the wrong equipment. Still, the Iranians hold on to the 18 already delivered (17 are eventually picked up on Feb. 22, 1986, during the delivery of the 500 TOWs by Southern Air Transport), and cancel the rest of the delivery. (Secord Testim., JHICI, 5/5/87, at 221-34; id., 5/6/87, at 55 [return of the 17 I-HAWKS].)

SECORD'S KNOWLEDGE OF THE SUMMER 1985 TOW
TRANSACTIONS

SECORD ACCOUNT:

In his discussions with officials of the Israeli Ministry of Defense with regard to the I-HAWK problem with Iran, Secord hears of the previous delivery of 500 (or 508 [Secord gives both numbers]) TOW missiles from Israel to Iran--100 in August, 400 in September 1985. The Israelis "told me [sc. Secord] that they had been assured that these 508 missiles would be replenished [by the U.S.] free of charge." (Secord Testim., JHICI, 5/6/87, at 4-6.)

THE 11/85 HAWK TRANSACTION: PILOTS REFUTE THE
OIL-DRILLING STORY

The pilots of the plane carrying the first shipment of HAWKs into Tehran inform their superiors, who then inform the head of the CIA air branch, that the plane carried missiles.

The Finding authorizes the provision of "certain foreign materiel and munitions" to the Government of Iran to get the U.S. hostages released. 25-26, 1985			<p>"A. I then received a call in late November from Mr. [G]horbanifar around the 25th or 26th of November, tel[l]ing me that he had an urgent message from the Prim[e M]inister of Iran to give to the President, and the message was, in essence, we have been very patient with you people. We have acted in good faith throughout. We have done everything we said we were going to do, and you are now cheating us, and you must act quickly to remedy this situation.</p> <p>"I brought this into the White House, found McFarlane not present, he was off at the summit, and was invited to tell Poindexter about this.</p> <p>"I went in and told Poindexter, gave him this message. Poindexter responded by saying thank you, and he wrote it down. And he said, you are being taken off this project, at least temporarily, because we now need people with greater technical expertise than you.</p> <p>"I interpreted this message to mean, Ghorbanifar said something like, there had been a terrible screw up in connections with a delivery, which I took to mean a delivery of weapons, following from these discussions earlier and I took Poindexter to mean that there had been some mechanical error of some sort.</p> <p>"I subsequently found out what happened.</p> <p>"Let me just finish one last thing. 			"A. Yes, I was aware of that.
			"Q. And did you inform Mr. McFarlane that a shipment of Hawk missiles was being planned?
			"A. Again, I don't recall whether I discussed it with Mr. McFarlane.
			"Q. Isn't that something that you would have if your role was simply as a person who was passing information from one source to another?
			"A. Absolutely.
			"Q. So if you had acquired that information, isn't it reasonable to assume that you would have passed it on to Mr. McFarlane?
			"A. Yes, sir. But we're still in the position of contacts with people like Kimche, where I'm sure I had contact. But I just don't remember it specifically. In the case of McFarlane, it is certainly reasonable that I would have had such contact, but I can't recall it and I can't place it.

And I remember saying to Schwimmer at one point, what are you going to do, have a caravan of 707s for these Hawks of yours? And he said no, we'll send a couple of planes. And I remember saying to him, but you can only get twelve Hawks in a 707 and he said, what are you talking about? We can get 40 or some such. So I remember sort of roughing it in my mind saying it was going to be something like three planes, three 707s. I was thinking along those lines. I think a hundred is about right.</p> <p>"Q. Why did you ask Colonel North how many Hawks can you get in a 707?</p> <p>"A. Just because Hawks were going to go to Iran and I was wondering [how many] planes it was going to be this time. It had been so exciting the last time with one plane. I wondered how many adventures we were going to have this time.</p> <p>"Q. Were you led to believe that this shipment of Hawks would result in the release of the remaining hostages?</p> <p>"A. Well, that was the theory.</p> <p>"Q. And you were skeptical about that, I take it?</p> <p>"A. Well, I was opposed to it.</p> <p>"Q. By this point you were opposed to any further exchanges of weapons for hostages, correct?</p> <p>"A. I mean, remember, we were still in the same basic mode as the August-September TOW shipments, which is to say that Israel was selling these weapons to Iran. That the United States knew about, that the United States approved it, but it was nonetheless not an American operation and America was not operationally involved. The only other person I know for sure was dealing with it at DOD was Admiral Poindexter, and I guess Mr. McFarlane. I know that I had to go to Admiral Poindexter a couple of times, and say, 'Hey, look, I am having a problem with A, B or C, and can you help?'</p> <p>"And he would either call or write or whatever was done. Then I would get a call back, and we would get on with it.</p> <p>"Mr. NIELDS. Was that the case with respect to this Hawk replenishment issue?</p> <p>"Mr. NORTH. Yes. "Mr. SARBANES. Colonel, let me say the committee, just for the record, the committee did find this memorandum in your safe.

"Mr. NORTH. I understand. I am not denying that. I am simply saying it is not a document that I originated, that I solicited, that I encouraged or that I believe I ever talked to the Director about.

"In effect, they were setting up a system where they would create a treasury from contributions by private individuals[,] by solicitations to foreign countries and by the profits off of arms sales, the mark-up off of arms sales. That was what General Secord called the enterprise when he testified before us. "And then the enterprise would be able to engage in activities around the world. When Mr. Hakim was here, we went over the Secord structure, and he had a chart there in which he had drawn in a box for Africa, and we asked him about that and he said, well, he said, one day General Secord says 'who knows, if we do a good job the President may send us to Angola,' and Mr. Hakim said, at the rate these people have been going in coming up with so many surprises, I would not be surprised if they indeed did that, and I didn't want to have the burden of running around doing too [m]any things at the same time, so I said let me go ahead and form another, not form a company, but have it ready. "And the question I would put to you, obviously: Is it an idea that has any attractive features in your mind?

"Secretary WEINBERGER. No, none whatsoever, Senator. I thought that the common law and all of the rules under which civilization is governed grew out of the recognition that the warring private feudal groups could lead to nothing but war, and that the only way you could ever get a peaceful community under the rule of law is to have a government which was the source of and indeed the repository of the law.

"So I think any of these things that attempt to run private operations of this nature become private governments, is totally wrong and I would be totally opposed to it. [Sic.]"

THE 11/85 HAWK TRANSACTION: MCFARLANE'S
AWARENESS

MCFARLANE ACCOUNT:

"Mr. NIELDS. I would like you to turn briefly to Exhibit 45. It is a long PROF message from North to Poindexter dated December 4, 1985, and I won't burden you or the committee at this time with reading the whole thing or even substantial portions of it.

"Suffice it to say that in the second paragraph, it makes reference to the attempted transfer of 80 Hawk missiles which went awry; it discusses a substituted complicated plan of arms for hostages in five installments; and then at the end of the PROF message on the last page, it states, 'Thus, the only parties fully aware of all dimensions of what we are about are you and RCM.'

			"RCM is you, is it not?
			"Mr. MCFARLANE. Yes.
			"Mr. NIELDS. And I take it you were fully aware as of that time--December 4, 1985--fully aware of the Hawk transaction that had gone awry and of the proposals for the future?
			"Mr. MCFARLANE. Well, I don't believe I was. I would have thought that if I was it would have been by the PROFs note, which was a traveling system that I had with me, but without either getting that or being copied on messages like this one it is unlikely that I was.
			"Mr. NIELDS. But you were aware of the shipment of the 18 Hawks. I think you have already testified to the fact that that went awry and of various aspects relating to it, including your call to the foreign minister of a third country and Mr. Rabin's concern about replenishment.
			"Mr. MCFARLANE. Yes, I have said that, and my point is only to say that I have not read this message.
			"If you are saying that I was conscience [sic (conscious)] of everything in it, I will be glad to take time to read it. I don't believe that I had then or have not a grasp of all the nitty-gritty of that mission.
			"Mr. NIELDS. And Mr. North and Mr. Poindexter, as you have also already indicated, were aware of that Hawk transaction which had gone awry.

"Mr. MCFARLANE. Well, I think, Mr. Nields, that I should say first of all that I accept responsibility for what happened, regardless of whether I knew about it or not. It was my job to have known, and I should have known whether I did or not.

"I believe that, because in the time from September to November of 1985 I was almost completely absorbed with preparations for the Geneva summit.

"In September we had the visit to Washington of the Soviet foreign minister, preparations for those include not only defining the agenda, but the President's absorption, digestion, and readiness to negotiate a number of items.

"It also involved the promotion in this country to Americans each of the four agenda items that the President was going to Geneva to meet on. That required four major speeches, all of whom [sic] were done by the NSC.

"In October it required that we not only go to the United Nations for a major delivery of a speech there and meet with a number of heads of State, but as well, that I go to Moscow for a pre-trip, pre-summit planning trip with Secretary

"This President, as all of you understand, is a very strong President who believes very much in Cabinet Government, and assigns to his Cabinet Officers great authority.

"The nature of the National Security Adviser is this Administration changed a little bit over the years.

"Initially, in 1981, at the beginning of the Administration, the National Security Adviser reported to the President through the Counselor to the President, who was Ed Meese at the time.

"After the first year, it was decided that that arrangement for a lot of different reasons didn't work out very well, and so when Bill Clark came in in January of 1982, the arrangements were changed so that the National Security Adviser, as in previous Administrations, reported directly to the President, and although not a Cabinet Officer, was considered a Cabinet-level official.

"This arrangement continued under Mr. McFarlane. It continued under me. I had direct access to the President.

"The Chief of Staff, Don Regan and I worked together, I think very constructively. The Chief of Staff's function involves a lot of logistics and domestic issues that have a direct correlation on the national security policy, and so we worked very closely together.

"Mr. LIMAN. And you also understood that that bill provided that it was only the State Department that could do the solicitation. Do you recall that, sir?

"Mr. POINDEXTER. Yes, I recall that.

"Mr. LIMAN. Now, was the money that you were getting from the Ayatollah, or Secord, however you viewed it, was that money to be limited to being disbursed for humanitarian aid?

"Mr. POINDEXTER. In no way. You see, the distinction here is that--and this is contrary to what you have heard before from other witnesses, but I never believed, and I don't believe today, that the Boland Amendment ever applied to the National Security Council staff or the President's personal staff. But the problem was that the Boland Amendment did apply to the State Department, it did apply to CIA, and it did apply to the Defense Department.

"We had been running this operation on our own for a long period of time because there was no other alternative in order to keep the contras alive. And we wanted help, we wanted also a more public recognition of the fact that the U.S. was supporting the contras in some way.

"I, frankly, I personally still wanted that to be done, the public support to be done in such a way that we could slowly turn back to a covert program run by the CIA, but it was important to me and to others that we get the State Department back into the game."

"A. The only way -- I mean I can't recall again specific conversations, but my general approach would have been to talk to him at the level of detail of saying that there was private support and third country support and, you know, conceivably at some point in '86 I may have told him that, you know, the support was running out and clearly we discussed it in that NSPG meeting.

"But I just simply wouldn't have gotten into that level of detail with him[.]

"Q. But as I understand it, when you say you wouldn't have gotten into that level of detail you have no recollection of ever saying to the President, when you talked about third country support or private support, the name of any country that was giving support?

"A. That's correct.

"Q. And did you ever tell the President that any of this support was solicited by a member of the government as opposed to just being volunteered?

"A. No, because, again going back to the beginning, on [redacted] support, which was the first support, I was told by Mr. McFarlane that he had informed the President about that, so I was always operating under the assumption the President was aware of that and I don't --

			"With respect to the obtaining of TOWs and Hawk spare parts from the Department of Defense, I believe the record shows that several Pentagon officers and the Army's General Counsel have testified that the order to transfer the weapons was given in such a way that it would bypass the normal Department of Defense usual procedures for monitoring of price and sales to the Central Intelligence Agency.
			"Are you able to shed any light on that?
			"Mr. POINDEXTER. You will have to ask Cap Weinberger on that. I don't know how he managed it in the Department. [See 86/05/23-930, -935.]
			"Mr. FOLEY. Did you participate in directing any particular method of obtaining those weapons?
			"Mr. POINDEXTER. No.
			"Mr. FOLEY. When Lieutenant General Brown of the Army staff apparently brought to your attention the fact that there might be a requirement to notify the Congress--do you recall that memorandum--

			referred it to me. And I also believe we had a telephone conversation about it before he sent it over.
			"Mr. FOLEY. Did you make the judgment that there was no requirement to notify the Congress or that the Congress should not be notified?
			"Mr. POINDEXTER. I didn't actually make that judgment. That judgment was made in January of 1986 by Ed Meese, who determined that under the provisions of the National Security Act, which was the statutory authority for the President to carry out this action, there was no reporting requirement. [See 86/11/18-020.]
			"See, what the Army did not understand, and apparently this is as a result of the way that Secretary Weinberger was managing the issue with the Department, they didn't understand that these weapons were not being transferred under the Arms Export Control Act and I think this memorandum was simply prepared to keep the Army's experts clean, that if it was under the Arms Export Control Act, there would be a reporting requirement.
			"Mr. FOLEY. So you decided that in accordance with the Attorney General's opinion that this was not required.

There was one occasion in which I had to change an Air France ticket and I went into the Air France offices on the Champs Elysee and walked up to the counter, and Ghorbanifar was standing next to me.

"So even though I had been ordered not to talk to him and so forth, there I was, and we went out to dinner. And while we were out to dinner, he gave me some documents, some stuff dealing with terrorism. It may have been that occasion.

"The Israelis have identified a means of transferring the Iranian provided funds to an Israeli Defense Force (IDF) account, which will be used for purchasing items not necessarily covered by FMS [Foreign Ministry Sales]. You have got to realize when I get into a job at that age I've left all my boyhood dreams aside and these things don't mean a whole lot to me. I was trying to be as clinical as possible. If I had realized it became important to find out exactly what we are talking about I would have paid more attention. THE 12/5/85 FINDING: NON-NOTIFICATION AND
RATIFICATION PROVISIONS

SPORKIN ACCOUNT, Part 1:

"Mr. WOODCOCK. . . . [L]et me direct your
attention to what has been marked as SS No. 4.
That is the finding which was drafted into formal
form by your assistant on November 25; is that
correct?

"Mr. SPORKIN. That is correct.

"Mr. WOODCOCK. Let me go over some of the
provisions of this document with you. This
document contains a provision for not notifying
Congress; is that correct?

"Mr. SPORKIN. That is correct.

"Mr. WOODCOCK. And do you recall how it is
that that provision came into being?

"Mr. SPORKIN. Yes. If I may, let me explain
to you what happened here.

"I told you, as a lawyer, when you are sizing
up a problem, I saw there were three major areas I
had to deal with. One was to make sure that this
project was fully authorized from the top, from
the highest authority in the land. The second
problem I had to deal with was how to maintain the
security of the project so that if it was viable,
it would be able to be accomplished. And the
third area, which we will get into, is how do we
deal with that very small window of 48 hours or so
in which the Agency had been involved in activity.

JOINT HEARINGS ON THE IRAN-CONTRA INVESTIGATION (JHICI)

LONG-FORM VERSION

			<p>And I had to deal with those three.</p> <p>"I dealt with the number one by saying we do it through a finding, because that goes to the President of the United States. I dealt with the secrecy and the security end of it by utilizing a provision that I don't recall; it might have been used one other time in my tenure, but one that is very rarely used and only in extreme circumstances, and that was in the non-notification to the Congress. And the third area, to take care of that 48-hour window, was to make sure that this activity had been authorized and that the President was willing to ratify it so that my people or the people of the Agency knew that they were operating under Presidential authority.</p> <p>"So those are the three issues and that's the way I dealt with it.</p> <p>"Mr. WOODCOCK. Your analysis of the three issues anticipated at least one or two lines of questioning I was about to throw out. One is that the no-notice provision is not something again that you undertook lightly; is that correct?</p> <p>"Mr. SPORKIN. Absolutely.</p> <p>"Mr. WOODCOCK. And that underscores again the sensitivity of the project on which you were working; is that correct?</p> <p>"Mr. SPORKIN. Right. That is absolutely correct, and this is, in my recollection, probably the first and only time and probably the last time it's ever going to be done, because if I realized this would get me my 15 minutes in the sun, I think I would have given up on that opportunity.</p> <p>"Mr. WOODCOCK. Now, bringing you back to the specific problem that you faced on November 25, even though you would not counsel the CIA to regularly indulge this practice, you were faced as the legal guardian of the rights of the CIA with a situation [in] which a covert action had in fact occurred and no finding had been issued for it; is that right?</p> <p>"Mr. SPORKIN. that are a little more deliberate than I am and probably when they determine they are going to go from point A to point B, sit down and analyze it and sometimes they can analyze it for weeks and months. Sometimes, however, you know, if you know you are going to go to point B, you cut through all that and say, I want to be at point B.

"So I did not fly-speck this and analyze it in the minute detail that some others might have done, and I wasn't really concerned whether this was or not a covert action. What I was concerned about was the fact that we were engaged in a very high-profile kind of activity that I believed we had to get--we had to make sure that the President of the United States was truly authorizing this activity.

"Because look at what we were doing: This was arms were going to Iran. I know that. I mean, I knew that that was a problem. And therefore, I wanted to make sure that it went to the top and I didn't sit down and determine, is this technically or not technically a covert action. It is not the way I practice law.

"Mr. WOODCOCK. You were faced with events that had already occurred; is that correct?

"Mr. SPORKIN. Yes. Well--

"Mr. WOODCOCK. I want to focus the questioning here on your ratification section alone, and the justification for the ratification section, in your mind, as a prudent lawyer, was that events had occurred; is that right?

"Mr. SPORKIN. That is absolutely correct.

"Mr. WOODCOCK. If events had not already

That is correct.</p> <p>"Mr. WOODCOCK. And part of your concern in analyzing this problem was that those persons who had participated in the events that had already occurred would not be cloaked in the finding and the Presidential authority that comes with it without the ratification provision; is that right?</p> <p>"Mr. SPORKIN. That--that is a possibility. The point I wanted to make sure is, I wanted to hammer it home. You understand--in other words, I wanted--it may well be they were protected by this finding because we were talking about, what, 48 hours of activity, transportation and communication--we were the tail-end of the process. We only got brought in because they could find nobody else to do it. We were bailing out a project.</p> <p>"Mr. WOODCOCK. That is you, the general counsel's office?</p> <p>"Mr. SPORKIN. Right. But I didn't want to sit down and say, can we do it, or we can't do it in that respect. 			"Mr. NUNN. The question I have is why was that finding which you have said clearly did not reflect in your view an accurate assessment of what the President really had in mind, why did that finding ever go to the President to begin with? Wasn't it your job to keep that kind of incomplete finding which you have testified was inconsistent with the objective from being both read and signed by the President of the United States?

			"Since I was taking over as National Security Adviser, I think I am the one that encouraged we have a meeting over in the residence on 7 December. It was a Saturday. In fact, I approached that meeting thinking that I was probably going to lead the discussion, because Mr. McFarlane's general view at that point, even though he technically was the National Security Adviser, he was sort of phasing out and I was handling all the meetings with the President at 9:30. He was aware of the proposals and he supported them. In fact, to my recollection, he said I had his proxy in terms of telling the President that. He asked if John McMahon, the Deputy Director of Central Intelligence, could attend in his stead. I said that would be fine.

"I can't recall whether I talked to the Vice President or not. Probably did, but I just can't remember that. The Vice President was not there. Apparently he was out of town. Certainly if he had been in town, he would have been invited and probably there.

"So we convened on Saturday morning, the 7th of December, over in the living room of the residence; and it was the President, Secretary of State, Secretary of Defense, the Chief of Staff, John McMahon, the Deputy Director of Central Intelligence, Mr. McFarlane, and me.

"Normally, I would keep notes at such a meeting, but again this was such a sensitive area that I did not by my recollection take any notes. I conceivably could have written a few things on a yellow legal pad, but subsequently destroyed them at the time, not recently. Because I couldn't find -- I can't find -- there may be conceivably a paper somewhere in the White House, but I rather doubt it. Secretary Shultz was concerned about our operation to staunch the flow of arms into Iran, which is one of the methods that we are using to try to stop the war between Iran and Iraq. "After all, our policy objective there is to stop the war. The policy objective is not to have an arms embargo. You don't just go out and have an arms embargo for nothing. The reason we have an arms embargo against Iran is because we want to try to influence the end of the war, but in its simplest terms, what was being proposed here was not in accordance with that particular method that we were using. "He was concerned that if the European</p>

			<p>"Mr. McCOLLUM. . . . Admiral, you testified last week that there was a meeting on December 7th, I believe it was, 1985, between [sic] yourself and Secretary Shultz, Secretary Weinberger, and the President in the White House to discuss the future of this Iranian initiative, whether to go forward, have another meeting in Europe, to pursue it anymore.</p> <p>"Am I not correct that you did?</p> <p>"Mr. POINDEXTER. Yes.</p> <p>"There were other people there. Mr. McFarlane, John McMahon, and the Chief of Staff, Don Regan.</p> <p>"Mr. McCOLLUM. Well, at that meeting, you also said that Secretary Shultz and Secretary Weinberger expressed very strong opposition to this Iranian initiative; and you went into some detail in describing that for us and some discussion ensued about what their objections were.</p> <p>"I am curious if on that occasion, or at any other time to your knowledge, if Secretary Shultz or Secretary Weinberger offered to the President any alternatives for getting the release of our hostages, alternatives to this Iranian initiative which, as I recall, you said the President had expressed a desire at that point after it was all over to go ahead with some comment to the effect that the--we ought to explore every avenue possible to see if we could get the hostages back.</p> <p>"Did they offer any alternatives to the President about how we might do it other than this Iranian play that you were engaged in or wanted to</p>

			"Mr. POINDEXTER. They did not.
			"Mr. McCOLLUM. At any time after that, did they?
			"Mr. POINDEXTER. No. Nor, to my recollection, any time before that. The NSC staff, I feel, was the driving force from the very beginning in trying to figure out how to get the hostages back. I don't mean to imply that other Departments and other officials in the Government were not concerned about the hostages; but very frankly, I don't recall a single recommendation from those two departments on initiatives to accomplish the objective.
			"Mr. McCOLLUM. Did they express, that is Secretary Shultz and Secretary Weinberger, either one, any kind of a feeling that we should simply let the hostages remain there, that that was their fate to be?
			"Mr. POINDEXTER. I'm sorry. Your question again?
			"Mr. McCOLLUM. My question was on that occasion or later, did there come from Secretary Shultz or Secretary Weinberger, to your knowledge, any feeling that we should simply leave the hostages there?
			"Mr. POINDEXTER. Oh, no. I don't think that is fair at all. I just don't think that their staffs had this as a high priority item on which they were working and coming up with options. Both Secretary Shultz and Secretary Weinberger, as officials of the Government and as human beings, are certainly concerned about the hostages. But

He certainly did not, when I was National Security Adviser, and he was very careful not to, not that he wasn't interested, but he recognized that the President wanted the National Security Adviser to report directly to him, and he accepted that.

These were the talking points that I had and I worked from. In the flow of a meeting, you try to make your points as effectively as you can, and so I used these as a basis for my comments.</p> <p>"Mr. BELNICK. Who spoke in favor of the policy at that meeting?</p> <p>"Secretary SHULTZ. Well, I felt that Don Regan shared the view of Secretary Weinberger and [me], and Mr. McMahon, who was representing the CIA, seemed to be, as I recall, rather passive. He didn't seem to push one way or the other, but I may not be remembering that just right.</p> <p>"Mr. McFarlane and Admiral Poindexter seemed to be more pro doing this. The President, I felt,</p>

And then the President said, 'Yes.' And so he gave it to him. So did I.</p> <p>"Mr. BELNICK. Was the President fully engaged in this conversation?</p> <p>"Secretary SHULTZ. Oh, yes. This idea that the President just sits around not paying attention, I don't know where anybody gets that idea. He is a very strong and decisive person.</p> <p>"Mr. BELNICK. Was he a strong proponent of the proposed policy at that meeting against your opposition and that of Secretary Weinberger?</p> <p>"Secretary SHULTZ. Well, I don't remember that he sort of argued with us. He listened, and you could feel his sense of frustration. He said at one time--because Cap is a particularly good lawyer--he said, 'There are legal problems here, Mr. President, in addition to all of the policy problems.[]'</p> <p>"You know how people get sometimes when they are frustrated. I know people have looked at those notes and wondered if the President was advocating violating the law, and there was no such tone to that at all. It was the kind of statement that I'm sure we all make sometimes when we are frustrated.</p> <p>"Mr. BELNICK. Where did you understand that the matter stood when that meeting ended on December 7?</p> <p>"Secretary SHULTZ. Well, I wasn't sure. But I felt that between Secretary Weinberger and [me], we had made a real dent and that with the--Don Regan seeing it the same way, we having talked through various aspects of what might be done, that perhaps we had won that argument. And, in fact, I think it turned out that way, because Mr. McFarlane was dispatched to London to talk to his contacts about a different kind of relationship to get our hostages out, but no arms; so that was the right way to put it, I thought it. I was very much in favor of doing that.</p> <p>"But he got nowhere with that, which wasn't surprising."</p> <p>(Shultz Testim., JHICI, 7/23/87, at 77-80. "Secretary WEINBERGER. No.

"Mr. EGGLESTON. Mr. McFarlane in testifying about this meeting, in front of this committee about this meeting, testified that after the meeting there was a decision about him going to meet Ghorbanifar in London. Do you recall that being discussed at the meeting?

"Secretary WEINBERGER. I don't, no. I have read since a great deal about it but I don't have any memory at that meeting that was discussed.

"Mr. EGGLESTON. And Mr. McFarlane has also testified indeed he did go the next day or two, met with Ghorbanifar and came back, there was an additional meeting on December 10 where he reported to the President on his meeting, his disappointing meeting with Mr. Ghorbanifar. debate subsequent to the disclosure of the operation about the impossibility of finding any moderates in Iran. I have always found that a little hard to believe, that everybody in Iran suddenly went from being--at least some of them--friendly to the United States. Would you comment generally on that proposition?

"Mr. SECORD. It was my view, and the view of my colleagues, that there are pragmatic factions in the hierarchy of the Government of Iran. Their actions have indicated this. It is common sense to assume that this is the case.

"There is a great body, I believe, of good will still in the minds of the Iranian people. Iranians always liked Americans. At least that was my impression in general. There are a lot of radicals, no question. They gained ascendancy. They exploited us, dubbed us the great satan, embarrassed us, and I don't condone that. I am absolutely upset by that, and have been for a long time.

"But there are still nonetheless, in my judgment, pragmatic people, men in the hierarchy, and these were the men with whom we were seeking to establish contact, and it was [with] this group that we did establish contact.

"Mr. CHENEY. So in your judgment, it was not a completely fallacious notion that there might be the possibility of somehow improving United States-Iranian relations through these transactions?

advance.

"So that it is quite conceivable to me that there are people in Iran who are publicly one thing and privately something quite different. This was one of the things which I thought we should be investigating and one of the reasons why I urged one course of action rather than the one that was ultimately adopted by the United States Government.

"But to answer your question, after all, I would characterize the public positions of the people with whom Mr. Ghorbanifar said he was in contact as mixed. Some of them were among the people who had the most radical reputations; some of them were people who had reputations as being somewhat blander or somewhat less ferocious.

"Q. Were you able to reach a conclusion about whether or not Mr. Ghorbanifar actually had contacts with these individuals?

"A. We were able to establish to our satisfaction that he did have contact because he was able to pick up the phone in Tel Aviv and dial Teheran and talk to these people and talk to them on a first-name basis, where clearly they knew who he was, what he was, what he was doing, and all that.

"This was one of several occasions on which he would make such calls with Nimrodi on the extension, listening.

"Q. Was it -- was Mr. Ghorbanifar in the posture or did he inform you that he had been sent by the Iranians or was he more in the posture of someone who was trying to bring two sides

"A. It was rather between those two positions and the impression was of a person who was acting with the knowledge of people in Teheran who either -- depending upon what sort of emphasis you want to give it -- either approved of what he was doing or were willing to let him try, but that in any case, they were interested in obtaining the same results as he was attempting to obtain, namely an improvement in the relationship between the two countries leading to a moderation of the behavior of Iran. That was the bottom line.

"Q. Was there any discussion in these conversations about whether or not Iran had control of the hostages?

"A. Yes, there was.

"Q. What did he tell you about it?

"A. He told us that he believed Iran had considerable control for the hostages and that they could, in fact, effect the release of the hostages."

I don't know that I was aware of the detail of General Secord's involvement with that airstrip, but it would not have surprised me to learn that.

"We simply--with all of the issues involved, simply didn't--I usually didn't get into that level of detail and I did not bring the President into that level of detail. He knew the contras were being supported. He knew they were being supported by third country funds and by private support activity and that we were keeping close track of what was happening.

IRAN ARMS SALES: "NEXT STEPS"
NORTH MEMO:

In a memo to McFarlane and Poindexter entitled "Next Steps" and labeled "eyes only," North reviews the options he considers necessary "[i]f we are to prevent the death or more of the hostages in the near future."

North lists the problems of Ghorbanifar's untrustworthiness, Schwimmer's arrangement of previous deals that have angered the Iranians and left Israel with inadequate funds for replenishment, and the U.S. "lack of operational

North then sets out four options: the arms-for-hostage swaps discussed in London, an Israeli delivery of 400 to 500 TOWs to restore "good faith," a military raid, and "do nothing." North rejects summarily the "do nothing" approach:</p> <p>"Very dangerous since U.S. HAS, IN FACT, PURSUED EARLIER PRESIDENTIAL DECISION to play along with Ghorbanifar's [sic] plan. U.S. reversal now in mid-stream could ignite Iranian fire -- hostages would be our minimum losses."</p> <p>At the end of the memo, North describes a "fifth option": the United States would directly sell arms to Iran, acting pursuant to a Presidential Finding and using Secord as an operational "conduit."</p> <p>(JHICI Ex. That is true. But Iran has an immense advantage in manpower. "Mr. McCLURE. As I recall the testimony, both from his direct testimony and that of others, he was very very skeptical about whether or not this channel was going to work, he was very skeptical about Mr. Ghorbanifar, and as I recall at least some comments were made that he was repulsed by the way Mr. Ghorbanifar had suggested arms-for-hostages trades in kind of a mathematical equation, is that correct?

"Mr. POINDEXTER. My recollection of his debrief was that he did not think that Mr. Ghorbanifar was a good channel, didn't have any confidence in him at all. That is the thing that sticks in my mind.

"Mr. McCLURE. He wrote a memo, didn't he, Mr. North wrote a memo indicating that the meeting was inconclusive?

"Mr. POINDEXTER. Colonel North wrote a memo and/or PROFS note. I can't recall right at the moment, you have it as an exhibit, I can't recall what exactly his conclusion was.

"Mr. McCLURE. What impression do you have in your mind now about Colonel North's opinion of the Israeli channel following the meeting in London?

			"A. Because, you know, some people felt that way. Colonel North would be one of those and there may very well have been others that felt the same way. I'm sure that issue was discussed with the President and he may have felt that way about it. I'm just telling you I didn't have as strong

a feeling about it.

"Q. Then give us your explanation as to what kept driving this initiative forward after Weinberger and Shultz were opposed to it from day one, McFarlane returned from London feeling that the intermediary wasn't trustworthy. Where was the support coming from for this?

"A. Well, it was coming from me, from the standpoint that I wanted to get channels in to the Iranian government so we could find out what was going on and try to influence events there and get the hostages out. It came from the President, not so much from the standpoint that if we stopped it would increase the risk to the hostages, but that there was a possibility of getting the hostages out.

"I mean, that was one of his major objectives, was to bring the hostages home. The best description that I have seen in my preparations was the Casey memorandum of that, of Bud's debrief of his London trip that's in the Tower Commission report [Tower, at B-50]. By my recollection, that's a fairly accurate account of the President's mood at that period of time.

"Q. And his mood was that he wanted to try?

"A. He wanted to try. And Mr. McFarlane didn't disagree with that. It's just that he didn't think that Ghorbanifar was the right channel to try and do it, and we didn't have any misconceptions even before he went as to the character of Ghorbanifar.

"Q. You had no reason or basis for disagreeing with McFarlane's assessment that

			"A. That is correct, and the efforts with Ghorbanifar after that point were primarily oriented toward opening up another channel. That's one of the reasons that I thought it was important that Mr. McFarlane go to Tehran.
			"Q. Well, at the time we're talking about, which is December of 1985, the channel was through Ghorbanifar [redacted] right?

This he said to the President at one of these 9:30 briefings, and, again, I believe it was the President, the Vice President, Poindexter, McFarlane, and myself. "Q. Was there any thought given at that point that you were now in a situation where, having started discussions, you were almost being 'blackjacked' into continuing? "A. I wouldn't say 'blackjacked,' but this was becoming increasingly evident, that unless we got on a new tack, we would, (a) probably never see our hostages; or (b) the whole project would end in dismal failure." 			<p>GHORBANIFAR'S MOCK-ASSASSINATION PROPOSAL LEDEEN ACCOUNT:</p> <p>At a mid-December 1985 meeting with Ledeen in Geneva, Ghorbanifar describes to him a mock-assassination proposal:</p> <p>"In addition, he [Ghorbanifar] proposed an operation having to do with Libya. He had developed a channel to Qadahfi, and this channel had introduced Ghorbanifar to Qadahfi as a person particularly well connected with the Mafia, and therefore in a position to carry out Mafia-type activities.</p> <p>"Qadahfi had said that the was willing to pay a large sum of money for the assassination of Mr. Al-Mugarief [sic (Dr. Mahmoud Sulaiman Maghrabi?)]</p>

That at this point, Qadahfi promised to do a favor in return to the presumed Mafia, so that once this funeral were staged, Ghorbanifar would then ask the Libyans to provide them with their contacts in Western Europe, so that he could use them to go after his presumed political opponents, Iran's presumed political opponents.</p> <p>"He said, therefore, this operation would achieve two results. It would in the end humiliate Qadahfi because at some weeks afterwards, Mr. Al-Mugarief would throw a surprise party and emerge publicly and sa[y] I was not killed. Qadahfi thought he had killed me, but he hadn't. Indeed, we took him for money and made a fool out of him, et cetera, and at the same time expose the European network of Libyans because the presumed Ma[f]ia would by then have been entitled to go back to Libya and say, okay, give us your European people in Western Europe, and the Libyans would have provided information about their people there as well.</p> <p>"Well, that sounded like a good idea to me. And so I came back to Washington, and reported this conversation to North, who thought that was a fine idea, and therefore, I went over to CIA and reported it to the counterterrorism people, Charlie Allen and Clarridge.</p>

[D]idn't this run the very risk at the time when the Iranians were so sensitive about being gouged and taken advantage of and lied to by a host of people, at that very time, that we would risk the lives of the hostages that you were very passionately concerned about, as is evident from the record, by combining these two covert programs in that fashion? "Mr. NORTH. It did. And we discussed that at length, Director Casey and I. I recall at least one occasion where the Admiral and I discussed it. "The fact is that we knew that the Iranians would pay even more than we were charged from intelligence that we had gathered. We knew that during the first channel, for example, that Mr. Ghorbanifar had a little frolic and diversion of his own going on in which he had pocketed at least some for himself, if not for others, a considerable sum. And that even the prices we charged, he further inflated. "And so we judged that risk to be minimum given that they would be--basically pay whatever they could to get these items or weapons from the source that--whatever source they could." original finding, the goals set forth by the President of the United States and that he had had an offer for a new type incentive, that is money, residuals for the contras, would you not think that the operations officer having made that report to the National Security Adviser that that information would be of the nature that would go to the President of the United States?

"Mr. MCFARLANE. Well, I think Senator Nunn, for me to let hindsight project what I would have done is a little unfair to Admiral Poindexter. I don't know what other considerations must have borne in his mind and I think John is a man of very sound judgment. While I was serving if a change of that magnitude had appeared I would have reported it.

"Mr. NUNN. Would you agree with my assessment that this was a change of significant magnitude in terms of diminished confidence by the operations officer, Colonel North, in the strategic goals and a new incentive being proposed?

"Mr. MCFARLANE. Well, I have to answer yes, and yet if that PROFS note was sent for example, and I don't know this, concurrent to another memo that diminished its significance, in context, which I don't have, it might be a matter of less emphasis by Colonel North. "Secretary WEINBERGER. No. There wasn't ever any slight suggestion of anything of that kind. There was never any discussion in my presence of price. The only discussion there was ever of that is when I instructed General Powell that he was to have the Army get full value from the CIA, and I never heard of any negotiation between the two agencies. "We stated the price, as I have said, unfortunately, it was apparently computed wrongly, but we stated the price, the CIA paid the bills and the weapons were delivered to them, but there was never any slight suggestion there was any fiddling with the price or any adjustment to the price or anything of that kind, and certainly no slight suggestion of the contras being in any way involved in it." First, arms shipments were rejected when hostages were not involved.</p> <p>"Second, the January 17 memorandum from Admiral Poindexter to the President explaining the first finding explicitly says that the arms shipments will cease until the hostages are released, and, finally, your exchange with Admiral Poindexter at the November 10 meeting confirms what you and he had been saying throughout that year, and the understanding was that there would be a shipment of arms to Iran.</p> <p>"It was anticipated that all hostages would then be released and if they were not, then there were to be no further shipment of arms to Iran. Let me ask whether if you care to comment on that conclusion.</p> <p>"Secretary WEINBERGER. Well, Senator, that conclusion involves an assumption that I know everything that motivated the President in making this decision, and I don't. But I never heard the President talk about this at any of the meetings we have described or any other time without tying the two together, and that one of the ways of trying to get this better opening with Iran, one of the things I disagreed with that we could do was to demonstrate the good faith of the representatives of the United States in discussing it, and that that would involve transfers of some of the weapons.</p> <p>"There's no question whatever that one of the factors motivating the President was the return of</p>

signed on 17 January, and we were proceeding ahead with the Iranian project, at some point Colonel North came to see me. My best recollection is it was probably in February. It could have been after that, but I believe it was in February. He came into my office. He would have been the only person there, and gave me a status report on the Iranian project, and as I said, we had been working on the legislative plan, but we saw that we were going to run out of money before we could get the \$100 million and the Sandinistas were being supplied a large amount of Soviet equipment. We were especially concerned about the HIND helicopters because they are so effective in that kind of -- that insurgency because of their mobility. We were frankly concerned about the abilities of the contras to survive until we could get the \$100 million.

"Colonel North was not only working the Iranian project, but he was also, obviously, as I have told you, working Central America. After he finished his briefing on the status report of the Iranian project, he said, 'Admiral,' or words to this effect, 'I think I figured out a way to provide some funds to the contras out of the Iranian project.' [See 86/00/02-520.]

"My impression at this point of the conversation was that it was clear to me that these were third country or private-party funds that would result from the arms sale to the Iranians and he said, 'I would like to proceed ahead with it.' I said, 'Well, let me think about it for a few minutes.'

That was not the motive here. The motive here was clearly either hostages or some sort of rapprochement with Iran, or a combination of both.</p> <p>"Since, number one, the motive of the sale was not a profit and since, number two, the United States Government got every pen free [sic (penny?)] it bargained for, it seems to me that money would have to fall in one of two other categories. I would like your opinion.</p> <p>"Number one, third-country or second-country money; and, number two, private money. I think an argument can also be made--and perhaps even some would consider it the better argument--that under an agency or constructive trust theory, the money does become property of the United States. When someone acts as an agent for a principal, whatever profits may accrue--even if unintended--may belong to the principal, so that I think there are a number of legal theories that are applicable here.</p> <p>"Among the things I have indicated earlier is that since this is a matter which will be ultimately the basis for certain conclusions of the Independent Counsel, I have deliberately tried not to make an absolute conclusion on this matter.</p>

was aware of private support, and the way Colonel North described this to me at the time, it was obvious to me that this fell in exactly the same category that these funds could either be characterized as private funds because of the way that we had--that Director Casey and I had agreed to carry out the finding.

"They could have been characterized as private funds or they could be characterized as third country funds.

"In my view, it was a matter of implementation of the President's policy with regard to support for the contras. We were in the process of working on our legislative plan to get \$100 million from Congress for essentially unrestricted support to the contras.

"We knew it was going to take time

". . . .

"So after weighing all the[s]e matters, and I also felt that I had the authority to approve it, because I had a commission from the President which was in very broad terms, my role was to make sure that his policies were implemented. In this case, the policy was very clear, and that was to support the contras.

"After working with the President for 5-1/2 years, the last 3 of which were very close, probably closer than any other officer in the White House except the Chief of Staff, I was convinced that I understood the President's thinking on this and that if I had taken it to him that he would have approved it.

"Now, I was not so naive as to believe that it

was not a politically volatile issue, it clearly was, because of the divisions that existed within the Congress on the issue of support for the contras, and it was clear that there will be a lot of people that would disagree, that would make accusations that indeed have been made.

"So although I was convinced that we could properly do it and that the President would approve if asked, I made a very deliberate decision not to ask the President so that I could insulate him from the decision and provide some future deniability for the President if it ever leaked out.

"Of course, our hope was that it would not leak out.

"Mr. LIMAN. When you say deniability, are you saying that your decision was not to tell the President so that he would be able to deny that he knew of it?

decided by the President as a sort of a procedural bagatelle almost, or bookkeeping entry. I was confused about it. The President, as I understand it, authorized the sale of weapons to Iran--that is policy number one.

"The President also was determined to keep the contras alive, hold their body and soul together through assistance from third countries and individuals, and he knew about some of the third countries who were helping.

"So I was curious as to why you consider the diversion of funds to be so politically embarrassing that you felt that you should not tell him?

"Mr. POINDEXTER. Senator, there are a large number of Members of Congress that do not agree with the President's policy with regard to contras and Nicaragua and Central America. I felt that if this became know[n], that something like what has happened would happen.

"I frankly didn't think it would be quite that severe, but I was convinced it would happen, and therefore, it was going to be a politically explosive issue that the President's opponents would take advantage of to cause as much problem for him as possible.

for not telling him?

"Mr. POINDEXTER. That is correct.

"Mr. LIMAN. Did you not think, sir, that given the potential for damage and embarrassment that he, the President of the United States, should have the choice whether to proceed with this use of the money?

"Mr. POINDEXTER. That thought didn't cross my mind at the time. It was a matter, in my view, of keeping the contras alive so that there would be a viable option in the future to continue the pressure against the Communist Government down there. If the contras disbanded because of lack of funds, and that was always a problem, then we wouldn't have that option, and my view was, again, you have got to put this in the context of many many meetings with the President talking to him extensively about the way he thought about these issues, and I am sure, as the members of these committees and the American public understand, this is a very strong President who is very willing to take unpopular positions and provide leadership to the country. And so I really, although I can't say that at the time the thought crossed my mind that you have described, but with hindsight, I still contend that I believe that the President would have approved the decision at the time if I had asked him.

"Mr. LIMAN. And in terms of your state of mind, because that is what I am interested in, at the time you made that decision, you believed that if you had told the President, he would have approved it.

"Mr. POINDEXTER. I really hadn't focused on that issue.

"Mr. LEON. Do you have any reason to believe that he did necessarily want deniability?

"Mr. POINDEXTER. That is correct. [Sic.] In fact, the answer to that would probably be that he did not want deniability.

"Mr. LEON. Was it your experience that the President was unwilling to face up to tough political questions?

"Mr. POINDEXTER. Absolutely not. As I tried in my testimony to point out, that this President was willing to make tough decisions.

"Mr. LEON. Was there ever any instance in the five-and-a half years that you worked at the NSC that you were aware of when the President said after he had been made aware of a risky or difficult political choice, don't bring that to my attention in the future?

"Mr. POINDEXTER. That's correct.

"Mr. LEON. They were freed from that choice by your decision.

"But the reverse to that coin is that you had to face that choice if you were confronted?

"Mr. POINDEXTER. That's correct.

"Mr. LEON. Colonel North was faced with that dilemma, was he not, in essence, in August, 1986?

"Mr. POINDEXTER. Reviewing it after the fact, yes, indeed, he was faced with that problem.

"Mr. LEON. Before he went to that briefing of the House Intelligence Committee that you agreed to, that you sent him to, did you consider the possibility that there might be a diversion question to him, some kind of inquiry along those lines?

"Mr. POINDEXTER. I don't believe that thought crossed my mind, Mr. Leon.

"We had kept--he and I had kept this issue, I thought, very highly compartmented and I didn't have any indication at that point that there were any leaks.

First of all, Senator, I believe if you go back and look at my testimony on May 2nd, when this issue first came up, I used the term deniability, that I wanted to provide the President deniability and insulate him from the decision. about it.

"Mr. NUNN. That is what I would call absolute deniability. If you don't know, it is not only plausible, it just didn't happen. Is that what you mean then?

"Mr. POINDEXTER. Absolute deniability would be a more accurate description.

"Mr. NUNN. Because that word has been used quite a bit during these hearings.

"Mr. POINDEXTER. It has been. And again because it is not something that is codified, it is the same thing with covert action and special activities. We use covert action when most of the time we are talking about special activities. But because deniability, plausible deniability or absolute deniability are [sic] not defined in statute anyplace, it is obviously open to interpretation.

"Mr. NUNN. Well, you are not--let's just make the record clear. You are not using plausible deniability as it has commonly been used and I defined it?

"Mr. POINDEXTER. As discussed in the morning newspaper, I believe, I am not using plausible deniability in that way or the way that you defined it."

Invariably, because you don't always have good options, there are high risks involved.</p> <p>"The bureaucracy--and I don't mean to demean them in any way, because there are a lot of very fine, dedicated public servants out there in the bureaucracy--but the problem is that many of the options that a President has in managing foreign policy involve high risk, and because of the mechanics of our government, the bureaucracy doesn't handle risk very well, high-risk situations. They are always concerned about failure and the results of failure.</p> <p>"This episode that we are presently involved with, I think, is a good demonstration of the costs of failure, because clearly our Iranian project failed, we didn't achieve our objectives, it was exposed before we had a chance to achieve the success that we thought was possible.</p> <p>"Now, because the cost of failure is very high, the bureaucracy is not willing to recommend, often recommend, or certainly endorse high-risk operations, because of their fear of failure and the resulting harangue that comes about because of failing. Therefore, they don't make those kinds of hard options available to the President. And I think one of the roles of the NSC staff has got to be to bring these options to the President, and because the bureaucracy is often not willing to push them once a decision is made, push them vigorously, I feel that in the very real world</p>

"Mr. POINDEXTER. It certainly would make it easier on the people involved to do that. I don't know. The future is obviously going to be very complex.

"Mr. BOREN. Admiral Poindexter, isn't it a matter of making it easier for the people involved? It's a question that in this republic with the democratic principles we have, the Constitution says the President is the Commander-in-Chief. It doesn't say the National Security Adviser; it doesn't say any bureaucrat appointed by the President. It says the President, and it is because he is elected by the people.

"So doesn't it trouble you, as we are talking about--we are talking about whether he met with the people, whether it is inconvenient, we are talking about the preservation of constitutional government.

"Mr. POINDEXTER. Senator, the difference between the way you think about it and the way I think about it, I frankly don't think, in the whole scheme of things, it is that important a decision. It obviously is a controversial one.

"The thing that's made it important in your eyes, in my mind, is the overreaction of the media to it, and members of Congress have to react to the media. I think that is what happened.

"Mr. BOREN. I guess we just have an honest disagreement and I would say that apparently the President himself now feels he wishes he'd been told and has implied that he would have prevented

"Mr. BECKLER. If this committee's record is the record before this committee and it is interested in getting the facts, I say nowhere in the factual record is there one scintilla of evidence that suggests in any way, shape or form that this witness, Admiral Poindexter, was told by the President that he should have been told that, either then, now or at any time in these last few weeks.

"That is what I'm talking about.

"Chairman HAMILTON. . . . But this is not a court of law; this is a congressional committee, and members of this committee have every right to refer to events that are reported in the media. And I think Senator Boren's position and question is well taken.

"You have testified here and stated that you were concerned about the disclosure of a lot of these facts concerning the diversion, concerning the sale of arms for hostages, and you wanted really to protect the President from political embarrassment. But isn't that political embarrassment that you talk of merely a consequence of a disclosure to the American people of misstatements and misleading information that the public might then be aware of?

"Wouldn't that be the political embarrassment?

"In other words, wouldn't it be, in effect, an attempt to keep the American people from knowing, from knowing what had taken place, and the political embarrassment as a consequence that would occur to the President, but weren't you keeping the American people from knowing what was happening?

"Mr. POINDEXTER. No, I don't view it that way at all. The people knew that the President wanted to support the contras and was going to do everything he could to do that. He constantly talked about that, how important it was.

"I have no doubt about the President's word on that matter--never have--because I've heard him say that in private as well as public.

"But in a sense, when I heard that question and answer, I said to myself, well, that's an interesting question, that's a Washington question, 'who did what to whom' type question, but the deeper question is how could it be that a staff person was the sole possessor of such a piece of information and had operational control over it and his colleagues didn't know about it and he had that decision in his hands.

analysis? Shouldn't the President be told about that kind of decision?

"Secretary SHULTZ. I think it is the responsibility of someone like myself or in the position of the National Security Adviser to seek the President's decisions. That was a very big thing and, in my opinion, a very wrong thing. So to decide on behalf of the President not to tell him about it is totally wrong.

"I think that the more controversial in a sense something may be, that you as a person in charge of some operation want to do, the greater your responsibility to point up to the President exactly what is controversial about it, not to try to--in this case, the decision was not to tell him at all but you can imagine people going in and sort of passing something by the President in a way that he perhaps doesn't quite see in a busy schedule the significance of it. "Mr. Cohen. You were the one in charge of covert operations.

"Mr. George. We are engaged in covert operations with the authorization and approval and appropriation of funds of the United States Congress.

"We obviously conduct many -- and you and I have been in many roundabouts where we didn't get the proper approval, where we didn't do what we said we did, but we do our best. The activity that we are looking into today was neither authorized nor appropriated. It contained private funds. They were spent for activities that the Congress was not engaged in and I think it might have been for activities that were not properly -- five-year hearings have proven to me -- were not properly vetted through the Senior Executive Branch of the Executive of the United States.

"At the bottom of it is you cannot take United States weapons and just go out and sell them for a profit and use the profits as you see fit.

"Mr. Cohen. What I am saying is that is pretty well accepted at the Agency.

"Mr. George. That's the gospel. That's the way you and I worked together for six years. I can't work any other way. I know I screw it up now and then, but I do my best to make it work that way.

"Mr. Cohen. The point is it's a matter of doctrine at the Agency: you simple to [sic (simply do)] not do this?

I said, 'No, you don't.' Well, he did. And I had no idea. So I mean the man -- I just don't know what to make of it. It is possible he did, it is possible he didn't. I walked out of that office that day thinking he didn't have cancer and he was going up to New York, I guess, for treatment of prostate cancer sort of on a recurring basis and I didn't have a clue about it.

That is correct.</p> <p>"Mr. NUNN. You will permit me to read from it this morning, will you not--it says, 'A well-placed legal source said that in the first week after his departure from the White House on November 25th, Poindexter and his attorneys plan to construct a legal defense around his contention that on two occasions in 1986 he told Reagan that the arms sales to Iran were generating money for the contras. According to this source, Poindexter did not tell Reagan there was an illegal diversion of money, but rather that funds for the contras contributed by the Iranians or Israelis were an ancillary benefit of the arms sale.'</p> <p>"Quoting from Time Magazine, April 6, 1987, 'Poindexter believes that he was following Ronald Reagan's policies and that he kept the President adequately informed. Indeed, he is likely to testify that on at least two occasions in 1986 he told Reagan in general terms that the contras were being helped as an ancillary or side benefit of the arms sale or the arms deal with Iran.'</p> <p>"Admiral, reading from your deposition, and I do think your attorney ought to have a chance to take a look at this, May 2[], 1987, page 162-163 [see preceding entry], there is something here</p>	<p>DIVERSION: WHO KNEW POINDEXTER ACCOUNT:</p> <p>See col. 2.</p>

"I do not recall any memo--in fact, I did not recall this one until November of this past year--that addresses the question of diversion.

". . . .

"Mr. LIMAN. . . . Do you, Admiral, dispute Colonel North's testimony that he sent you five different memos, referring to the diversion and recommending that you brief the President?

"Mr. POINDEXTER. I would not characterize it that way.

"I would say, as I have testified, that I do not remember any other memos.

"Mr. LIMAN. Well, if you got one memo after another recommending that you brief the President, would it not have been your practice to say to Colonel North, stop sending me memos referring to the diversion and referring to the President?

"Mr. BECKLER. Objection

". . . .

"Mr. POINDEXTER. Mr. Liman, I obviously have looked at this memo quite a bit since it was provided to us by the committee staff, and I think it's important to note the structure and note very carefully, the recommendation on the last page--it's the last page of the memo, not the tab--but it says that the President approved the structure depicted above under current situation and the terms of reference.

"Now, the paragraph about diversion is in a paragraph after the one labeled 'current

situation,' which lays out the plan for the next steps. The paragraph on diversion is in the discussion paragraph.

"And so even in this memo, if I got it at the time, which I don't recall, I very likely would have read it, talked to the President about the current situation, knew that I didn't want to talk to him about the transfer of funds because I had made a deliberate decision earlier not to do that, and of course Colonel North didn't know that, and I purposely wanted to keep that a little obscure because I firmly believe in very tight compartmentation of these issues.

"Colonel North did not need to know that. I was his superior, I had the authority to tell him to do it. I told him to do it. He had no reason to question that.

"Mr. LIMAN. Admiral, you say you acted in order to provide the President with deniability. How does it provide the President with deniability if the lieutenant colonel sent five separate memos referring to diversion and each saying brief the President?

"Mr. POINDEXTER. Mr. Liman, as I've testified already, I do not recall any other memos. I frankly don't. To my knowledge, there weren't any other memos that addressed diversion.

"There were memos that addressed other subjects, and I guess I don't know what more you want me to say."

"A. In fact, my operating assumption was that there wasn't anything in writing on it, because I told Colonel North repeatedly not to put anything in writing on the transfer of funds to the contras and not to talk to anybody about it.

"Q. Transfer of funds from whom?

"A. From the Iranian project to the democratic resistance, to the contras.

"Q. How many -- you said you told him repeatedly?

"A. I told him several times. I was surprised to learn -- and I forget exactly when I learned it -- that he said something to Mr. McFarlane on the way back from Tehran. I would have advised him or told him not to do that if I knew he was planning on it.

"Q. Why?

"A. Because, again, I didn't want anybody else responsible for it.

"Q. You were willing to take the rap yourself?

"A. I was willing to take the responsibility for my decision. I thought it was important to the President and I thought it was important to the long-term interests of the United States.

"THE WITNESS: That was not really part of my calculus, I guess. We thought -- I think, trying to reconstruct again my frame of mind at the time, by that point, when Colonel North raised this with me, we knew that the Iranians were being overcharged prior to U.S. involvement. The Iranians were, in my assessment, were aware that they were having to pay premium prices, and its long-term impact on U.S.-Iranian relations was pretty low on my concern."

Mr. Hakim's records, the officials records of the enterprise, established that Mr. Hakim and Mr. Secord transferred over a quarter of a million dollars of those residuals for their own benefit, investing those moneys in an arms company and a timber operation in the Northwest. Did you approve those kinds of actions? Were those actions contemplated by you when you approved the diversion? "Mr. POINDEXTER. Those actions or alleged actions never came to my attention so I was completely unaware of them. "Mr. TRIBLE. Would you have authorized that kind of activity? "Mr. POINDEXTER. to his business, so I think it was fair to say that his business was losing money. If it had come to me, I would have had to evaluate all the circumstances and all the facts at the time. The point is, it didn't come to me, so I didn't get to it.

"Mr. TRIBLE. But you could not have contemplated that kind of activity when you authorized this operation? You wanted the profits to go to the contras, didn't you?

"Mr. POINDEXTER. Yes, I wanted the residuals, after expenses, to go to the contras, and I simply didn't address at the time the possibility of large profits.

"Mr. TRIBLE. Admiral, the records of the enterprise, again Mr. Hakim's records and his sworn testimony before us, establish[] that in the last arms sale to the contras, we had a \$2.1 million arms sale and a profit accruing to the enterprise of \$861,000 and that was divided equally [among] Hakim, Secord and Clines.

"Is that the kind of reasonable compensation--

"Mr. BECKLER. Mr. Chairman, I would like to object. We have never been given access or an opportunity to examine the records, all the accounting records, in preparation for our testimony here today.

"Let me say further that there has been all kinds of amounts thrown out. . . .

". . . .

"Mr. TRIBLE. Admiral, let me ask you again, when you approved this activity, did you authorize that kind of a mark-up, a mark-up in excess of 40

"Mr. POINDEXTER. As I have testified and answered an earlier question of yours, Senator Tribe, the question of compensation or profits for the private organization that was carrying this out simply didn't come up.

"Mr. TRIBLE. It would seem apparent to me that anyone who cared about the contras, as you and I do, would be offended by that kind of activity.

"Let me ask you this question--

"Mr. POINDEXTER. If I knew all the facts, I might be able to draw some conclusions about this, but I don't know all the facts and I'm not going to speculate.

"Mr. TRIBLE. What [a]bout financial oversight in accounting? What oversight in accounting did you put in place to ensure that these large sums of money would be properly allocated?

"Mr. POINDEXTER. The trust and confidence in General Secord and Colonel North.

"Mr. TRIBLE. When the CIA or CIA proprietaries undertake covert activity, isn't it true that there is very strict accounting and oversight?

"Mr. POINDEXTER. I have no idea.

The foreign policy was clearly established by the President. There was no secret about that. He campaigned on these issues. He campaigned on support for the contras. implementing that policy. And I still contend that the American people don't want to know those details.

"Mr. TRIBLE. So then Hakim and Secord were operating on behalf of the government. They were agents of the government in their activities?

"Mr. POINDEXTER. They were operating in cooperation with the government as private individuals. Very patriotic, I might add, and I am not going to pass--you have made a lot of allegations as to what sort of profits they have made or not made, and I think you know that the facts will have to speak for themselves, but I hope at some point a better explanation as to their long-term thinking about the use of these funds can be made.

"The point is that when they started, they didn't know--we didn't know that this was going to be exposed in November of '86. We were trying to open an effective second channel into the Iranian government. They would have had no idea how long this was going to go on. It needed to be a self-sustaining operation so all the questions that went into the money that they set aside I think are still uncertain in my mind as to what their intentions were.

"Mr. TRIBLE. Admiral, clearly you didn't know about the financial aspects of this operation?

"Mr. POINDEXTER. I did not."

"Your covert operation was different. Your operation had no presidential approval, it had no finding. All the covert operations that I know of had findings. Your covert operation had no financial accountability. That is not true of any covert operation that I am aware of, run by the CIA.

"Your covert operation generator spent funds for projects that were not the subject to oversight by the Congress, by the statutory members of the National Security Council, and according to your account, by the President.

"So wasn't the basic difference between your covert operation and the reserve for contingencies that yours was outside the framework of Government, and the reserve, with all of its flexibility, is within the framework of the Government?

"Mr. NORTH. I guess my problem in answering that, Mr. Chairman, is that having testified for five and a half days as to what I did, and how it was done, and the way it was all conducted, I'm sure that you are going to draw conclusions like the one you've just drawn.

"When I was talking about the Jay treaties, it was not that President Washington in any way was not cooperative with the Congress; he simply refused to lay before the Congress all that had gone on in the negotiation of those treaties.

"That was debated again in the 1930s in the U.S. vs. Curtiss-Wright Export Corporation, and the Supreme Court held again that it was within the purview of the President of the United States to conduct secret activities and to conduct secret negotiations to further the foreign policy goals of the United States.

his own Executive Orders or chooses to waive the provisions of his own NSDDs which do not have the force of law, it is fully within his rights to do so.

"Mr. MITCHELL. But the President told the Tower Board, and I quote: 'The President told the Board of January 26, 1987 that he did not know that the NS[C] staff was engaged in helping the contras,' and therefore, the President could not have waived the provisions of the Orders as you have described, and could not have so designated the NSC if, as he said, he did not know that the NSC staff was engaged in helping the contras, could he?

"Mr. NORTH. You are asking me to speak for the President and what he said to the Tower Board, and I have not talked with the Tower Board, nor was I there when he did. The fact is, as I have testified for four straight days, I--I think there is no one on this committee that would debate it--kept my superiors fully apprized of just exactly what I was doing.

"They were, and I was a member of the President's staff. The President has since said, I believe publicly, that he was aware of what was being done, and that in fact it was at least partially his idea.

"There is no doubt that the President wanted the policy of support for the Nicaraguan resistance pursued, and I did so to the very best of my abilities."

"But this is a far cry from saying that I or other members of the Administration authorized what was clearly beyond anyone's power to authorize, specifically the so-called full service offshore operation of Messrs. Secord, Hakim, and Ghorbanifar.

"This is untrue because it is unthinkable. It violates every tenet of my political beliefs, everything that I have sought throughout my career to sustain and advance.

"These are my beliefs and the rule of law and the doctrine of accountability.

"These are the essence of the constitutional form of government which I have fought in war to defend, which I worked in Congress here to carry out and were part of my deepest beliefs when I served in the Executive Branch as Counselor to the Secretary of State and as the President's National Security Adviser."

"Mr. LIMAN. Did you ever say anything to Colonel North that you can recall that would have led him to believe that you would approve the creation of a private organization to do covert operations for the United States with unappropriated funds?

"Mr. POINDEXTER. As I recall, in the early days of the administration, maybe as early as the second or third year, there were some informal discussions internally on the NSC staff about some of the problems that we saw in conducting covert activity, and I don't recall at the time that there was any thought of non-appropriated funds, but there was thought that maybe--in fact, I can recall a conversation, maybe not with Chairman Hamilton, but I think maybe Chairman Durenberger on the question of maybe we ought to move covert activity entirely out of the CIA. NORTH'S CONTRA ACTIVITIES: AUTHORIZATION
McFARLANE RESPONSE TO NORTH:

"Mr. NUNN. There us a difference about knowing about and authorizing, and nuances of words, but of these activities that you did not know about, were there any of them that you would not have considered authorized?

"Mr. MCFARLANE. Well. I think basically, Senator Nunn, that the only activities that I would have considered matters at least that I would have approved of were the kinds of things that Colonel North could offer to the contras on occasions where he visitied them in the field that didn't involve strategy or even tactics, but what he naturally, inevitably as a military expert, and he is, would have given, just because it would have been almost impossible not to.

"Furthermore, that he was authorized and directed, in fact, to try to fashion some kind of civilian membership in the leadership, and also to try to come up with a scheme that would be appealing to the Congress and perhaps even to the Sandinistas for a compromise.

his appearance before the panel, Colonel North testified that you were aware of his activities, knowledgeable about his activities in assisting the contras and in coordinating what was referred to during his testimony as a full service operation of resupply and lethal assistance to the contras during the period of the various Boland restrictions.

"Let me read to you some of the precise testimony that Colonel North gave on that point. . . . 'As I said yesterday, counsel, it was fairly well known, certainly to those men although they may deny it, what I was doing. There came a time when the man at the top of that list--' and he was pointing to a memo, sir, which had your name at the top of the list as a recipient--'there came a time when the man at the top of that list, at the occasion of the retirement of Ambassador Robert Oakley took me aside just weeks before I was summarily fired, put his arm around my shoulder, and told me what a remarkable job I had done keeping the Nicaraguan Resistance alive. There is no doubt that they knew what I was doing, and yet I didn't think it was necessary that the hundreds of staffers who would see that memo on the way to their front officers had a clear recognition of what I was doing.'

I am going--I am a little vague on this because Central America was on Mr. McFarlane's agenda at the time, and although I was indirectly involved with a lot of aspects of it, it was his prime responsibility. I think that the whole thing evolved. As Colonel North testified, he participated in the Kissinger Commission, Bipartisan Commission on Central America, and Mr. McFarlane assigned him to make contact with the political leadership of the contras. "As has been testified, we were concerned about the political cohesiveness of the contra organization. They were a group that had different views, and we saw that they needed to coalesce so that they would be stronger, not only in the field, but in terms of our ability to get</p>

support for them in Washington.

"And so Colonel North's involvement with this evolved over a period of time, and when the first Boland Amendment came in and the CIA and State and Defense could no longer be involved, as I have testified before, in effect, Colonel North became the switching point between a private network and the contras and also became the primary U.S. Government contact with the political leadership of the contras in order to keep them together.

"Mr. LIMAN. All right. Did you participate in briefing the President on Colonel North's role?

"Mr. POINDEXTER. I usually went to the 9:30 briefings with Mr. McFarlane during '84 and '85.

"Mr. LIMAN. Do you remember discussions of Colonel North's role?

"Mr. POINDEXTER. I frankly can't remember specific discussions on that. I think it was--it was covered in general terms. But I don't think that every time Colonel North made a trip down to El Salvador or Honduras that that would have necessarily been briefed to the President.

"Mr. LIMAN. All right. Admiral, the activities of Colonel North began before you became National Security Adviser, correct?

"Mr. POINDEXTER. They did.

"Mr. LIMAN. And then you authorized him to continue them during your tenure.

"Mr. POINDEXTER. That is correct. When I took over, I was, as I have testified, I was generally aware of what Colonel North was doing, and when I took over, I recall a brief discussion with him that he should continue on track.

order for the contras to survive as a viable force, they needed advice, assistance, they needed political help to get themselves organized so they could present a better picture to the American public, and without somebody on the NSC, which in my mind was not covered by the Boland Amendment, without somebody on the NSC staff providing that kind of function, I don't think they would have survived until we could get the hundred million dollars. They would have disbanded I think or been chopped up by the Sandinistas as soon as the Boland Amendment passed, the Soviets increased their arms deliveries, they started putting in the HIND helicopters.

what their objectives were. The leaders, Adolfo Calero, Arturo Cruz, and Adolfo Robelo -- and sometimes you will see in my notes a shorthand AAA, and that refers to those three leaders. He maintained very close contact with them. Colonel North maintained close contact with Secord.

"So my view of the operation was that Colonel North was the switching point that made the whole system work. You know, what he got involved with directly or somebody else did is a little fuzzy in my mind, but clearly I viewed Ollie as the kingpin to the Central America opposition once the CIA was restricted.

"Q. How much did the President know of this?

"A. Well, that's a little hard to tell for me. I think the President was clearly aware that Colonel North was the primary staff officer on the NSC for the democratic resistance.

"Colonel North would have participated in probably several meetings with the President. Certainly when the AAA came up to meet with the President, Colonel North would be in those meetings. He would be in any NSC and maybe some of the NSPG meetings that were held on Central America, so the President would see his face on any event associated with Central America.

"Colonel North would -- once in a while -- would go up to the 9:30 meetings if he had something to report about Central America.

"The President is not a man for great detail, which I think everybody is aware. It wasn't a matter we would brief him in great detail on, where all the funds were coming from or exactly .

"Now, can you shed any light on the statement that the President did not know that the NSC staff was engaged in helping the contras based on your briefings, sir?

"Mr. POINDEXTER. I don't, I have not talked to the President, Mr. Liman, and since I left the White House on the 25th of November, I have not discussed this issue with him. I don't know exactly how the question was phrased or exactly what the President had in mind when he provided that answer.

"My understanding is that since that time, he has modified that position a little bit.

"Mr. LIMAN. And one of your duties as National Security Advisor you said was to brief the President. Did you brief the President about the fact that the NSC staff was, to use the words of the Tower Report, helping the contras?

"Mr. POINDEXTER. Again, as I testified yesterday, I want to be very careful, and I want to recall a specific conversation with the President before I would answer that in an affirmative way. I do not recall a specific conversation in that regard, but I don't think that's unusual, because I would not get into the details with the President as to who was doing

what. The President knew that there was a Boland Amendment, he knew there were restrictions on the government. As he has said, I think, since November of 1986, that he did not feel that the Boland Amendment applied to his personal staff and that that was his feeling all along. I knew that.

"He knew the contras were being supported, and we simply didn't get into the details of exactly who was doing what. He understood that Colonel North was the chief action officer on Central America, Colonel North was always there when there were briefings in detail as to what was happening in Central America. Colonel North was there with various foreign officials that were involved, and so the President, I think clearly associated with it.

"Now, you know, the President doesn't recall apparently a specific briefing in which I laid out in great detail all of the ways that we were going about implementing the President's policy, and I frankly don't find that surprising. It would not, frankly, at that time have been a matter of great interest as to exactly how we were implementing the President's policy.

"Mr. LIMAN. But yesterday, in explaining why you felt that the authorization of the diversion by you was consistent with the President's policies and with something--that had you told him, he would have approved, you were basing that on your discussions with the President.

"Mr. POINDEXTER. That is correct.

Was there not some planning done for who would take it over so that they would be viable if and when you got Congress to renew the appropriations?

"A. Well, you know that was so long ago when that happened. No doubt, we did have discussions on it. But without going back through the schedule, I really can't reconstruct exactly how the transition occurred.

THE RESUPPLY OPERATION: CASEY'S KNOWLEDGE
NORTH ACCOUNT:

"Mr. BOLAND. Now, you've testified in great detail about Director Casey's knowledge of and interest in your activities on behalf of the contras.

"What degree of control did he exert over these . . . activities?

"You testified that on one occasion in connection with another activity Mr. Casey told you to get a ship, and you got a ship.

"Was there ever a time when Director Casey told you to do something that you didn't do it?

"Mr. NORTH. I didn't get a lawyer soon enough.

"Mr. BOLAND. Now, when you communed, as you put it, with Director Casey, did you give him details of the Second contra resupply operation, the amount of weapons being delivered, the money available and expended, the number of aircraft and personnel involved, and so forth?

"Mr. NORTH. Well, there were times when we did have detailed discussions. I don't recollect ever having specific knowledge of how much was left in any one account, as I've already testified, and I think my testimony ought to stand on those other things that the Director and I

"Mr. BOLAND. . . . [W]as there someone else in the CIA you contacted when . . . it was not possible to meet with or talk with Casey?

"Mr. NORTH. Well, in my testimony and in the records that I turned over to the committee and those that were provided by the White House, it is very clear that I was in direct contact with the station chief in a Central American country." (North Testim., JHICI, 7/14/87, at 129-31.)

THE RESUPPLY OPERATION: CIA KNOWLEDGE

the fact that the Ayatollah was providing funds to the contras?

"Mr. NORTH. I do not recall specifically telling General Secord that joke or story, but I do not joke with the President, if I may amplify on that.

"As I recall, there was a meeting in the mid-to-late summer of 1986 in which the discussion focused on the fact that the Congress, both Houses, had voted \$100 million to aid the Nicaraguan resistance and that the \$100 million, appropriations and authorizations, had to be sent forward to the President and for whatever reason, the Congress was unwilling to send a coordinated bill forward for the President's signature.

". . . .

"At the conclusion of that meeting, on leaving -- at the door as I recall, I said to the back of Admiral Poindexter, 'It looks like the Ayatollah is going to have the help the Nicaraguan Freedom Fighters a little longer,' or words to that effect.

"It was an aside. I do not believe the President could have heard it, and I exaggerated that to General Secord, and I did so because General Secord was in my estimation exhausted.

"He had been recruited by me to assist this country in carrying out what initially was one and then a multiple of covert operations.

"I had brought him into these, and as a consequence, he was literally exhausted. And it was an enticement. It was an exaggeration on my part that I had told the President that little

joke, and I had not.

"Mr. NIELDS. Now, first you said that you don't recall whether you said that to General Secord and then you said you exaggerated to General Secord that you had joked with the President.

"Which is it?

"Mr. NORTH. I guess maybe the way I should have characterized it, Counsel, if I told it to General Secord that way, it was done as an enticement.

"Mr. NIELDS. So you are not denying that you said that to General Secord?

"Mr. NORTH. Absolutely not.

"Mr. NIELDS. So what you are telling us is that you falsely told General Secord that you had such a discussion with the President?

"Mr. POINDEXTER. Yes, Mr. Liman, there was. There was one point that I was very sorely tempted to tell him, but I didn't. And, as I recall, we were aboard Air Force I on the way back from the Economic Summit in Tokyo, and in fact I think you have an exhibit that was prepared about that time that is pertinent here. And the President had just finished reading a book by a man named Netanyahu, who is presently the Israeli Ambassador to the United Nations. . . . Ambassador Netanyahu has written a book on combatting terrorism, and the President had been reading that book during the trip over to the Economic Summit, and he finished it on the way back, and he had a discussion with me on the airplane--this would have been in May, the middle of May, 1986--and we had received via facsimile from the White House Office a paper that laid out the status of our legislative plans for getting the 100 million, and one of the options in the paper was that if we were unable to get the 100 million, to pull out, drop our support of the contras.

"And I had discussed that with the President, and he had been very adamant at the time. He says, look, I don't want to pull out our support for the contras for any reason. This would be an unacceptable option, isn't there something that I could do unilaterally?

"And by that, I took it to mean he could do on his own that didn't require congressional approval. And I was sorely tempted at that point to tell him what we had working, but I thought better of it and did not.

"Mr. NORTH. There was some discussion of that. The bottom line of that--I mean--what you need to understand, there were proposals for everything in the world, not just from the Iranians, but from all kinds of people, many of which were impractical or unworkable or impossible. And what we finally arrived at is that we would try to--and I think we did--replenish the Israelis with weapons that were identical to the ones that they had shipped; and second of all, of the same era of manufacture and I think there was a safety feature added to the new ones that we didn't even charge for. Maybe the ones that they had shipped had the safety feature.

"I don't recall. But the bottom line was that we agreed, the Israelis and us, that we would replenish them with items similar and as identical as possible to the ones that they had shipped.

". . . .

"In other words, we were not charging any preferential price just because it was Israel. We charged the price for those weapons of that date based on what the DoD estimated the price to be, I believe.

"I was not in the Pentagon pricing it and I wasn't down at the arsenal we took them from.

"Mr. VAN CLEVE. But you never asked, I take it, that the Defense Department give the Israelis a better deal than they otherwise would have been given if they had purchased the same weapons?

"Mr. LIMAN. Was that different from the one in December that you discussed at the December 7 meeting?

"Mr. POINDEXTER. Well, that's--I'm in the awkward position of not having notes on the December 7 meeting, which I didn't take, and so I can't remember exactly.

"I think--my best recollection is that the plan was always to try to get the hostages--at least in the initial stages, the plan was always to try to get the hostages back in one lump, all five at the same time. There clearly are problems with a seriatim release.

"The new feature of the plan was really something different. As I understood your question, you were trying to say that that was the new feature of that plan, and that I don't think was particularly new.

"Mr. LIMAN. No. I was asking you whether the fact Israel would absorb the loss of 500 TOWs was a new feature.

"Mr. POINDEXTER. Okay. I have trouble with that, too, because I, I don't think--well, I don't think I realized personally until this meeting in January that the Israelis expected us to replace the first 500. So I'm not sure, because I wasn't in on the discussions with the Israelis in July and August and September--I'm not sure exactly what, how the U.S. commitment was described at that time.

"Mr. LIMAN. Now, let's move on.

I took that to mean that they were very anxious for us to proceed ahead with the initiative. The initiative was important to them, and I think that they recognized that if we didn't agree and go along with them that we could cause some problems for them in the future, and so from that standpoint, a selfish standpoint on the part of Israel, but understandable that unless we proceeded ahead, they were going to have a more difficult time.</p> <p>"So it is not that we ignored that, we accepted that that was probably one of their reasons. "I doubt seriously if the President had made a decision rather than to postpone notification, to go ahead with notification if people would have given him any new insights as to what the problems were. And I think it's also important, and I don't think the public fully understands this, is that under the Hughes-Ryan Amendment to the National Security Act, that Congress cannot veto a covert action. In other words, it is not a matter of sending the action up here for approval. The matter is one of informing for oversight purposes--

86/01/06-400 SOMETIME IN JANUARY 1986			<p>THE JANUARY FINDINGS NORTH ACCOUNT:</p> <p>North testified that in January 1986 he personally coordinated the drafting of a Finding with the Attorney General and with Lowell Jensen. He could not recall having specifically discussed with Meese the September or November shipments to Iran. North clarified that he might have brought up the prior shipments, however.</p> <p>"Mr. VAN CLEVE. Would there have been any reason, sir, for you to have discussed the previous shipments with him [the Attorney General] if what you were doing was seeking clearance for future shipments?</p> <p>"Mr. NORTH. 			<p>. . . I had worked with Mr. Sporkin of the Office of General Counsel at the CIA on [the 12/5/85 Finding], and it was my understanding--perhaps faulty--that it was in the process of working on that finding that the Attorney General had come across or found or made note of an earlier determination by then Attorney General French Smith to the effect the arms sales can be conducted in accord with a Presidential finding, and further that the retroactive or ratification language that was included in the November finding had been run by the Attorney General; and since, in my experience, other findings were cleared by the Attorney General's office, this one had been, too.</p> <p>"Thus, when the finding was signed by the President, that finding had been, by my reckoning, at that point in time cleared by the Attorney General. "Mr. LIMAN. Would you describe his mood?

"Mr. POINDEXTER. Well, his mood was one of--essentially of not being willing to give up, that he thought that we ought to continue working on the problem. After all, my recollection is that Mr. McFarlane wasn't opposed to the initiative at that point or wasn't recommending total opposition to it; he was only recommending if we were going to proceed ahead, that we find a different channel because he didn't trust Ghorbanifar. And the President's mood was one of wanting to continue to work the issue.

"After the December meeting, as I recall, I tasked Colonel North to work with Stanley Sporkin out at the agency and also touch base with either Ed Meese or some of his people that worked findings, to prepare a broader, more all-encompassing finding that clearly laid out all of our objectives, and then once we had that staffed and properly discussed, we would be in a much better situation to proceed ahead with some form of an Iranian project, with all of the objectives that are clearly laid out in that.

"And, as I recall, this Exhibit [JMP] 24 was essentially the first draft that I saw of the broader finding that Colonel North and others in the Government had worked to produce, and probably what I did in early January--the meeting with Mr. Nir was on the 2nd. That afternoon--the President was on the West Coast--that afternoon I flew out to the West Coast to join up with the President. I had been on leave back here over the holidays

Having lost in the first time around, why try it again?"</p> <p>"Well, it seemed again a worthwhile effort. I come back to the fact that it is important that we have contacts with Iran. Let's do all we can to maintain some liaison there in the hopes of continuing to be at least neutral, if not pro-Western, and, accordingly, if we could make contacts higher up in that government, all right, let's try it again."</p> <p>"Mr. SMILJANICH. 			<p>"Mr. REGAN. As I recall, on January 7th he did go into some detail as to what the new plan would be, or that there would be a new cast of characters and that he would--I think he forecast--that he would be going inside Iran to make contacts within the country itself.</p> <p>"And that is what led me to change my mind about whether we should take another chance or not.</p> <p>"Mr. COHEN. I think you pointed out the irony involved. Apparently you were never told about the structure of how it was to be handled in terms of the shipment and the payment. I take it from your testimony that you said that your understanding of the Attorney General's position was that although we could continue to do it that way, that it had been done earlier, that it was easier to support and clearly if we did it direct. But I don't think it is fair to conclude that I can specifically say that Ed Meese knew about the earlier shipments. I have testified on that just earlier today. I think those shipments may very likely have been discussed, but I can't absolutely confirm that. Certainly the method, the use of the Arms Export Control Act, was clearly discussed.</p> <p>"Mr. RODINO. "Mr. POINDEXTER. The bulk of the discussions on the 7th and the detailed discussions on the finding on the 16th were all oriented toward the future as to what we were going to do in the future. Now, I said earlier in testimony that my assumption was that we probably did discuss those earlier shipments, but I can't remember for sure that we did. We certainly talked about the method that was used.

"Mr. RODINO. Yes, I know you did state this morning, I think in answer to the question from Congressman McCollum, that you found it difficult to believe that we didn't get off on the 1985 shipment, although you did say that you couldn't recall it specifically. Neither could you rule it out?

THE 1/7/86 MEETING ON THE IRAN INITIATIVE
MEESE ACCOUNT:

The Attorney General testified in his opening statement:

"My first exposure to the Iran Initiative was in reality rather brief. I recall on the 7th of January, 1986 being asked to attend a meeting with the President in the Oval Office, along with other members of the Cabinet and other members of the White House staff. Parenthetically, let me state that my calendar shows, and I have been told by others, that on the previous day, the 6th of

			<p>January, the Deputy Attorney General, Lowell Jensen, and I met with Lieutenant Colonel Oliver North who gave us a short briefing on an Iranian Initiative. I do not specifically remember that meeting, but I am satisfied that it took place.</p> <p>"At the meeting on the 7th of January in the President's office, Admiral Poindexter and Director Casey raised the proposed Iran Initiative. As described, the initiative involved overtures to more moderate elements in Iran, and the cultivation of a relationship that could in the future be to the geopolitical advantage of the United States.</p> <p>"The proposal was also described as possibly helping to end the long Iran-Iraq War. The initiative was also seen as a means of decreasing Iranian sponsorship of terrorism, forestalling Soviet designs on the area and gaining Iranian assistance for the release of the Americans then being held hostage in the Middle East.</p> <p>"We discussed the Israeli suggestions concerning the initiative, especially concerning a transfer of arms from the United States and assistance in the release of hostages from Iran, as a means of establishing with each side the good faith of the other. I was present at that meeting both as the President's legal advisor and as a member of the Cabinet and of the NSC.</p> <p>"One legal issue that was raised concerned the appropriate statutory authority for an arms transfer as part of the strategic initiative. Based on my familiarity with a 1981 opinion by then-Attorney General William French Smith, I</p>

Secretary Shultz and Secretary Weinberger opposed it. My own counsel was that, while a very close question, the benefit seemed to slightly outweigh the risks, especially since I had the impression at that time that a timeframe of 30 to 60 days was contemplated and that the risks were, therefore, short-term.</p> <p>"It's my recollection that the meeting included a brief discussion that a Presidential finding would be necessary because of the proposed involvement of the Central Intelligence Agency. I believe there was also a discussion of the necessity of notifying Congress and the legality of delaying that notification because of the extreme hazard to the hostages and others. I do not recall anyone at the meeting arguing in favor of immediate notification.</p> <p>"With regard to the legality of the delay, I do recall stating that I believed a short delay was appropriate but wanted to examine the statute before I agreed that such a postponement would be permissible. At the conclusion of the meeting the President decided that the project was worth pursuing and directed Admiral Poindexter and Director Casey to proceed.</p> <p>"I should add parenthetically that it was not my understanding at the meeting that anyone was discussing arms for hostages transactions or that the President understood the proposal in those</p>

A limited number of defensive weapons were to be sold to certain Iranians to demonstrate the United States' good faith. They, in turn, as a display of their good faith, were to negotiate separately with forces in Lebanon for the return of the American hostages. No direct dealings with the hostage-takers nor the payment of any type of ransom was ever contemplated." (Meese Testim., JHICI, 7/28/87, at 4-7.)</p>

The presence of the Soviet [U]nion and the men as [sic (menace?)]</p> <p>to the region by the Soviet Union was one that was a part of the total backdrop of the discussion.</p> <p>"The initiative had to do, first of all, with the objective of developing a channel of communication with elements in Iran. Iran has several factions in its Government and it was felt that one of the factions or representatives of one of the factions might be amenable to continuing communications so that we would be able to increase our influence over that government either in the near future or in the distant future when there would be a change in that Government.</p> <p>"Secondly, an objective was to use contact with that element to try to end the Iran-Iraq war.</p> <p>"A third objective was to again, through that medium, through those forces, to try to decrease Iranian participation in or sponsorship of terrorism.</p> <p>"And fourthly, to encourage that group to use their influence to assist in the obtaining of the release of hostages that were being held in the Middle East.</p> <p>"The transfer of weapons was a part, as I mentioned in my opening statement, of reciprocal good faith on both sides and the issue was discussed at great length, that was the primary discussion in the meeting on the 7th of whether</p>

"To our knowledge, was that information made available to the President?

"Attorney General MEESE. I have no knowledge that it was. At all times--and I was only in one meeting with the President on this subject in January of 1986. But at other meetings, even as late November of 1986, when this matter was discussed as to the Iranian influence or the extent of this control, I believe we were advised by Admiral Poindexter, it may have been others, that while the Iranians had influence over the--those who were holding the hostages, they did not have control over them."

"Secretary WEINBERGER. No. That degree of specificity wasn't there, but the point was made that, and I had not seen the earlier opinion of the Attorney General predecessor at that time. The point [was] made to the President [t]hat, Mr. President, if you decide you want to do this, you can do it, and you don't have to use the Arms Export Control Act, there are other ways it can be done.

"Mr. EGGLESTON. Was there any discussion about factors or things that had changed?

"Secretary WEINBERGER. No. The meeting, as I said, in January seemed to be very much a re-run of the December meeting with the exception that I noted. That is to say, I made the same point, George Shultz made the same points. Bill Casey felt that there would be an intelligence gain, and there was also talk of the hostages as one of the motivating factors, but not the motivating factor, but the responses of the [P]resident seemed to me to indicate he had changed his view and had now decided he wanted to do this.

came back and, as I had a very graphic description that this had ended. On the 7th you came back to another meeting, the 7th of January, a month later, actually the President the day before had signed a finding, Chief of Staff Regan thought it was probably in mistake, that it was really a draft finding but in any event, the President had signed a finding to move ahead with sending the arms.

"So when you went into the meeting on the 7th, the President had already done that the day before. Did you have a sense at the outset of that meeting that the decision had already been made that you, in effect, were in a stacked meeting?

"Secretary WEINBERGER. I don't think at the outset, Senator. But as the meeting progressed, and as the points that I made seemed quite clearly not to be having any effect and from time to time were refuted or differing viewpoints were expressed, I got the impression, as I mentioned, at the end of that meeting, that the President had decided the other way."

"For you personally or, however you would want to do it, in closed session, I would be glad to develop them further, but that is simply not correct that there were no other alternatives.

"Mr. SARBANES. There is an ongoing program to find out through direct contacts, through intelligence, in any way we can, information about our hostages, to see if we can find out where they are, to talk to people who may have information about them, to stay in touch with the families so that they know always that there is some place, there is a person in the government who is trying to keep track. assumption was they are doing things but they aren't getting anywhere, which is what I thought would likely be the case anyway.

"Then I get this cable when I'm in Tokyo about this deal that was apparently proposed, and that was a specific thing, and I was surprised by that and upset by that, and I marched over to the Presidential area of the hotel and I talked to Don Regan and, at some point in through there, John Poindexter; I was told by Poindexter, 'We are not dealing with these people, this is not our deal.' [See 86/05/00-600, -607.] And what do I find out in the course of your investigation here? I find out that the next day, I guess, or shortly thereafter, Admiral Poindexter is sending Colonel North off to do something that looks suspiciously like the deal that he denied, and telling Colonel North, 'Now the last thing in the world you want to do is don't go anywhere near the mission in London.' [See 86/05/05-200.] But he gave me reassurance it's not our deal. And I objected. I didn't throw that cable away; I did something about it.

"And then comes early June, I guess it was, or sometime in there, when it became known to me, I don't recall exactly how it became known to a number of people that there had been the mission to Tehran, and it had fizzled, and Admiral Poindexter told me then the whole thing had been told to stand down. So at that point, I don't have anything to resign about.

"Subsequently, a couple other things took place that gave me the feeling as I've described

And I have never hesitated in my time in the Cabinet to speak up to Presidents or to resign, if I felt the situation warranted it. In this case, I looked at it the way I did." "But I have to tell you, Congressman, that as this hearing has gone on and I've seen in the form of these PROF notes and so on the systematic way in which the National Security Council staff deliberately deceived me, I might say long before I made the comment to Admiral Poindexter about not needing to know about the details, this was not something that started after that, long before and

afterwards, that my sense of 'did I do enough' has to a certain extent given way to a little edge of anger about it.

"So anyway, that's my story and there it is.

"Mr. HYDE. Well, Mr. Secretary, let me just say this. Your advice was the sound advice and the right advice, and might have saved an awful lot from happening that we're not through with yet, and it is simply my position that I wish you had done everything humanly possible, and you have indicated that you think you did, although on the 21st of January when you testified, you said you should have been more aggressive in probing this. But all I'm saying is--

"Secretary SHULTZ. My colleagues say I'm too self-critical. I am. I worry about these things. And as I say I don't give myself A plus or anything like that in all of this. But, as I also said, I had no idea of the misrepresentations that characterized this whole thing. And in response to Senator Tribble just now, not having to do with the Iran business at all but in response to a legitimate congressional, statutorily proper solicitation of funds from Brunei, we were given a number to use and told this was a number controlled by the freedom fighters, and the note that Senator Tribble read out showed that Admiral Poindexter knew absolutely well that they controlled that number or their colleagues did, and they were deceiving us.

"Mr. HYDE. Mr. Secretary, my time is up. I just want to say I guess the bottom line with me is I'm glad you didn't resign, but I wish you had

All right. To answer the question I'd like to go back to the first version of the Finding. either of these Acts could not be sold to Iran without "U.S. consent, notice to Congress, and the eligibility of the third country recipient for U.S. aid."

Because the planners have determined there would be no notice and because Iran's terrorist activities have rendered it ineligible, the Israeli sale/U.S. replenishment approach is not feasible. The lawyers conclude, however, that a sale of weapons from DoD stocks to the CIA under the Economy Act, followed by a CIA sale to Israel or Iran, would be legal. A Presidential Finding would be required.

THE 1/7/86 MEETING ON THE IRAN INITIATIVE:

TOPICS DISCUSSED

SHULTZ ACCOUNT:

(1) Shultz learned from Poindexter on 1/4/86 of Nir's proposal of sending 3,000 TOWs to Iran and the release of U.S. hostages; Nir's proposals were discussed at the 1/7/86 meeting. (Shultz Testim., JHICI, 7/23/87, at 82; JHICI Ex. GPS-B [DoS Chronology].)

(2) Israel was to offer to Iran release of non-"bloody" Hizballah prisoners plus 3,000 TOWs for U.S. hostages; Israel was to be the conduit and the arrangement was to be deniable; no

"A. Resupply should be as routine as possible to prevent disclosure on our side. May take longer than two months. However, Albert says if crisis arises Joshua promises that we will deliver all required by Galaxie [apparently C 5A cargo plane] in less than eighteen hours.

"B. Joshua also wants both your govt and ours to stay with no comment if operation is disclosed.

86/01/09-300 JANUARY 9, 1986		CONTRA AID: CASEY'S STRATEGY AND THE ISSUE OF COOKED INTELLIGENCE C/CATF ACCOUNT: "Mr. Rudman. . . . One of the things that I am sure, with the extraordinary record you have had in the agency it has to concern you as much as it concerns other people, is the whole feeling as expressed by the Secretary of State whenever you start mixing up the people who are doing the intelligence estimates and policy making you get into kind of shak[ly] ground. There is a handwritten note for a 9 January 1986 NSC briefing of Mr. Casey which read, and you were at the meeting, 'The DCI wants to make the insurgency choice stark. Either we go all out to support them or they will go down the drain. DCI wants to add some detail on how we are going to strengthen the FDN.' "Now that, of course, was during a period the CIA had a very limited law according to the law that was then in effect. And I guess my question is: would you agree with me that that note gives some credence to the fact that maybe there was some cooking of intelligence going on on which basis the President of the United States was

		"[C/CATF.] I am still reeling from that one. I didn't understand that one.	
		"Mr. Rudman. Neither did I and I thought I would ask you about it.	
		"[C/CATF.] I think that Director Casey, who is the senior analyst, really believed that the choices were and are stark. I believe that the body of intelligence there is to support that, that particular statement, and it was the assessment, that is the assessment that as intelligence advisor to the President he wanted to make, he wanted to add details about how we could strengthen the FDN. It is important to know at that 9 January meeting there was a key decision taking place.	
		"That was the meeting, as I recall, where the decisions were going to be made about how to go for the next aid package. That is the \$10 million decision. That means what are we going to do with the \$100 million of tasking me or somebody --

"(Witness conferring with counsel)

"[C/CATF.] I don't know where these notes came from. I recall getting ready for that meeting, and I believe --

"Mr. Rudman. They came from the agency.

"[C/CATF.] I beg your pardon. I can see they did. I really don't think from my direct knowledge the Director cooked intelligence on Central America. I think he presented it the way he saw it. He felt very strongly. I think the body of intelligence is there in the main to support what he had to say. I think the facts have spoken pretty well for themselves.

"I am one of the key operational analysts and I never heard the Director say anything about Central America I was personally uncomfortable with."

THE SHIFT FROM ISRAELI TO U.S. ARMS SALES
MEMO FOR CASEY:

A one-page, unsigned CIA memorandum dated January 13, 1986 updates Casey on the "Tow for Hostage deal." The memorandum shows that legal obstacles and the high cost of Improved TOW missiles are pushing the planners toward transforming the deal into one in which the Iranians would receive basic TOWs sold by DoD to the CIA under the Economy Act. After a review of the problems with other methods, the memorandum states:

"Therefore they want to use the second option under which CIA would buy 4,000 basic Tows from DoD for \$21 million. As far as Defense is concerned these purchases would be for general CIA uses for assistance in [redacted] etc., and other purposes. The money for the Iranian account would be transferred to the Israelis. The Israelis would transfer that money to a CIA account to pay for this purchase of the Tows from DoD, the shippers would move the Tows to the Israelis who would then move them on to the Iranians. The Israelis would keep their basic Tows and the problem of upgrading them to the new Tows would be handled in the normal DoD-Israeli relationship."

"1. At approximately 1420 hours today I received a secure line telephone call from the General Counsel. He wanted to discuss whether I saw any problems or reporting requirements with a proposal to have DoD provide weapons to a CIA 'agent' who would pay for the weapons with money supplied by a friendly third country. The agent would then supply the weapons to the intended recipient country. The agent would have no connection with CIA other than to act as a 'middle man' with our authority.

"2. I told the General Counsel that I would feel more comfortable if CIA were directly involved in the activity and that it would be essential that we act in furtherance of a traditional covert action objective. . . .

"The key issue in this entire matter revolves around whether or not there will be reports made to Congress. Each of the Acts involved--the Foreign Assistance Act, the Arms Export Control Act, and indeed the National Security Act as amended--have [sic] certain reporting provisions in them. While the National Security Act provides for a certain limited reporting procedure, it is my view that there may be other ways of making a suitable report by exercise of the President's constitutional prerogatives.

"One such possibility would be not to report the activity until after it has been successfully concluded and to brief only the chairman and ranking minority members of the two Oversight Committees. This would maximize the security of the mission and reduce the possibility of its premature disclosure.

How would that further the relationship for the Iranian moderates if we were to within that 30 to 60-day period get all of our hostages, put them on board a plane or ship, notify Congress, run the risk as everyone was concerned about this leaking, and consider having a long-term relationship with the Iranians? Wouldn't that totally wipe out the so-called first channel or later the second channel if in fact we--once we got our hostages back, now is the time to notify Congress and run the same risks of leaks?</p> <p>"Attorney General MEESE. Well, I think two things. First, it certainly would not have posed a risk to the hostages, and that was one of the risks.</p> <p>"And, secondly, I think that having had that successful aspect of it, that it was less likely that we would run those risks. Certainly the Iranians could be much more removed from the situation than to be directly involved in sensitive negotiations with the Hizballah.</p> <p>"Mr. COHEN. Mr. Attorney General, I just want to make the point again that I think the administration has overstated the case in trying to hold out the fear of a leak coming from one of the leadership, either the House or Senate, on this issue that it would jeopardize the lives of hostages. I think it is clear from the record that we are entrusted with many many covert</p>

Yet the Congress has been trusted.</p> <p>"I would venture to say I think the reason that we were not to be entrusted with this operation, number one, because it was an expressed contradiction to the public policy adopted by the administration, namely trading weapons with the Iranians; and, number two, that the administration was so deeply divided. I am struck by the notion that somehow Congress could not have been trusted with this information about the transfer of weapons to Iran when I look down the list of those who knew. We have Ghorbanifar, the Iranian, who has been described as a professional or pathological liar. We had Adnan Khashoggi, an international financier. We have Mr. Furmark, and we can talk about him in a moment; we have two Canadian businessmen; Rafael Quintero; Mr. Nir; Nimrodi; Mr. Secord; but not Bob Dole, Robert Byrd, Lee Hamilton, or Dick Cheney, or not Speaker O'Neill or Bob Michel. That really troubles me.</p> <p>"Attorney General MEESE. Senator, I can only say as an observer, because I can share your concern, quite frankly, the one thing I am convinced is that in the President's mind, and certainly my mind as well, this delay in complying with this timely notification requirement was solely out of concern for the jeopardy of the hostages and the elements in Iran.</p> <p>"The other aspects, whether there was a divided administration, or whether there w[ere]</p>

			"[Attorney General MEESE.] I also would say that I think personally it should--that there should be few, if ever, instances, and this was one of the very rare instances where this administration has not immediately provided prior notification. I have been present, for example, in the Grenada rescue effort where those same officials you mentioned were brought down in my presence. I think it is a very rare thing that would happen.
			"That it why this was--that is why I am convinced that in the mind of the President, rightfully so, in the mind of others there, this was such a rare situation that also key people within the administration were not even notified. So it was not, in any way, a slight, a deliberate slight of Congress as opposed to the administration.
			"I think most of us are as much concerned or more concerned with leaks in the Executive Branch than we are with the Intelligence Committees or the leadership of the Congress. I assure you that it is my own view that notification of Congress is

"Secretary SHULTZ. I have no recollection of being at such a meeting, and my records show that I arrived back in the department at 3:20, I believe.

"Mr. BELNICK. Yes, sir.

So there's no point in discussing it or I wouldn't have argued about it or reported back to my assistant when I debriefed on that meeting that I had said that I--I don't mean that I'm trying to act like a lawyer here, but that it was my sense that there were still legal problems and that it was unwise. As I recall, his rationale was that if -- he reiterated again that he was in agreement with the William French Smith determination earlier, but that if we were going to do this under the National Security Act, then the CIA would be purchasing the material from the Defense Department under the Economy Act and under those conditions there would be no reporting requirements required to the Congress, whereas if the Israelis had taken weapons from their stock and sold them to Iran, those weapons that they were selling them would have been transferred to Israel under the Arms Export Control Act and, therefore, technically there would be a reporting requirement for the third-country transfer of those arms. And the way to make it clean -- and, of course, I wasn't so much worried about those details, but I saw this was a way that we could have more direct control of the operation, because, frankly, we were uneasy with what Schwimmer and Nimrod [sic] had been doing, and I just felt that we had more control over the whole thing and make sure we didn't go through another screw-up in November.</p> <p>"A lot of this recollection now I have thought about the issue for a long time, over the past few weeks, months. One of the key reasons that Ed decided or determined that the President could legally carry out such a project that involved arms--and you had testimony about this before, it goes back to the William French Smith determination several years earlier on an arms issue. I understood that going into the 16 January meeting, but I didn't really understand up until that time that Ed felt that we should, rather than having the Israelis sell what was in their stock to the Iranians and then the U.S. replenish the Israeli stocks, he felt that we ought to go direct, that we ought to--</p> <p>"Mr. LIMAN. I would say from all of the documents we have, he ended up in operational control of the Iran Initiative on your behalf, not anyone at the CIA. I am not talking about the diversion now. I am talking about the finding authorized under law, the finding, whether it was timely, retroactive, whatever. There was at least some attempt to comply. In January or -- in January, mid-January, 198 -- let me get my dates right, 1986, at the time of the finding, although I was at that moment engaged with the Director in discussions on improving the agency's counter-terrorism posture abilities, there were certain aspects to the Iran Initiative that involved Ghorbanifar, that involved terrorism. Ghorbanifar claimed, and was later proved correct, to have had good information on a terrorist event, on an attempted terrorist event, [redacted] last year.
			"In the context of that, it was very clear to me that the Director preferred that the agency run the entire Iranian operation. And I have so told the Tower Commission when they asked me on this particular issue.

Yet you and others at the Agency have insisted that the CIA played only a support role in the Iranian operation.</p> <p>"There are some of us who, having some knowledge of intelligence operations, have commented upon the fact that the professionals in this business were not used particularly when it came to the DEA ransom operation, and in the case of the Iranian operation also. Casey's weakness was probably to say, 'oh, we'll take a chance.'</p> <p>"Mr. Hyde. Would you yield to me?</p> <p>"Mr. Stokes. Yes.</p> <p>"Mr. Hyde. Isn't it a fact that the CIA bureaucracy, as the State Department bureaucracy and possibly the Defense Department bureaucracy, were not hot for this thing at all and there was a fear of Director Casey's that had the CIA been into operations on this that there might have been leaks or there certainly would have been a lack of enthusiasm for it, and better to go with the gung-ho guys who felt this was a great, neat idea, is that too wild a speculation?</p>

However, there is another possibility. Some time ago Attorney General William French Smith determined that under an appropriate finding you could authorize the CIA to sell arms to countries outside of the provisions of the laws and reporting requirements for foreign military sales. The objectives of the Israeli plan could be met if the CIA, using an authorized agent as necessary, purchased arms from the Department of Defense under the Economy Act and then transferred them to Iran directly after receiving appropriate payment from Iran.</p> <p>"The Covert Action Finding attached . . . provides the latitude for the transactions The Iranians have indicated an immediate requirement for 4,000 basic TOW weapons for use in the launchers they already hold.</p> <p>"</p>

			<p>" . . . [I]t is proposed that Israel make the necessary arrangements for the sale of 4000 TOW weapons to Iran. Sufficient funds to cover the sale would be transferred to an agent of the CIA. The CIA would then purchase the weapons from the Department of Defense and deliver the weapons to Iran through the agent. If all of the hostages are not released after the first shipment of 1000 weapons, further transfers would cease.</p> <p>"On the other hand, since hostage release is in some respects a byproduct of a larger effort to develop ties to potentially moderate forces in Iran, you may wish to redirect such transfers to other groups within the government at a later time.</p> <p>" You have discussed the general outlines of the Israeli plan with Secretaries Shultz and Weinberger, Attorney General Meese and Director Casey. The Secretaries do not recommend you proceed with this plan. Attorney General Meese and Director Casey believe the short-term and long-term objectives of the plan warrant the policy risks involved and recommend you approve the attached Finding. "That was an intelligence assessment. I felt, and a number in the State Department--not in the intelligence unit, but people who were familiar with the situation--felt that that was not a correct assessment.

"In early 1986--I don't know just what the date was--there was a reassessment made, and the reassessment in a sense corrected that, and gave an estimate that the situation, that the analysis of mid-1985 had been proven wrong, and I think much more the way we had thought really it was, and I think it is quite clear that during much of 1986, Iran was very much the aggressive country in the war.

In that memo, that the President was basically using for his decision to sign that finding, wasn't it important to point to others in the Administration, including the interagency review that had a different view of the balance between Iran and Iraq? "Mr. POINDEXTER. I think that the President was aware at the time as to the other view. I frankly did not put great emphasis on that point one way or the other. "Mr. NUNN. requested with which we would not agree, and as I have testified yesterday, a big part of our objective in talking to the Iranians about the longer term interests of the United States and of Iran as we saw it was to convince them that the war with Iraq was a useless proposition that should be brought to an end as soon as possible.

"We pointed out to them the threat that we saw from the Soviet Union on their northern border, the fact that the Soviets have contingency plans and train for an invasion across the border, and in our view there wasn't any way the Soviet Union could allow Iran to win the war against Iraq and we were very straightforward with them.

"We told them that we didn't want them to win the war and we didn't want Iraq to win the war, we wanted a negotiated solution in which the territorial boundaries of both countries were preserved.

"Mr. HEFLIN. It is my understanding that Admiral Crowe, the top military man and Chairman of the Joint Chiefs of Staff, found out about the Iranian arms sale by accident in late June or early July of 1986, and this would have been after five of the six arms sales to Iran had occurred. [See entries starting at 86/06/21-630.]

"With all of the relationship between Russia, the effect in the Mideast, in retrospect, do you not feel that our top military man, the Chairman of the Joint Chiefs of Staff, should have been consulted relative to the decision to sell arms to Iran?

			<p>have always said--we don't want either side to win. We don't want Iraq to win either, frankly. We would like to see a negotiated settlement that preserves the territorial integrity of both countries and there has been some concern that Iran might lose.</p> <p>"So it was a very careful balancing game. One of the reasons that the President agreed to provide some very limited intelligence to the Iranians was to convince them that it was a futile effort in the war with Iraq. You must recall that Iraq started this war by an invasion across the border after the Shah died when Saddam Husayn thought that he had an opportunity for some easy win. Now it is true that since that time, some 6 or 7 years ago, that Iraq has indicated they would be prepared to end the war and Iran has been the one that has refused to sit down at the negotiating table, and one of our objectives as borne out by the terms of references for Bud McFarlane's trip to Tehran was to convince Iran that they couldn't win the war because of what we saw as Soviet interests in the area, and to bring the war to an end, and I think that especially with the second channel we were beginning to have some impact on that.</p> <p>"Mr. HEFLIN. Considering a worst case scenario, which should have been considered, in my judgment, in staff planning for the selling of 4000 TOWs, if you had a massive battle in which a large number of tanks, if 5 to 1 TOWs, one out of the five could have crippled or caused some damage, serious damage to a TOW [sic (tank)], or</p>

one out of ten TOWs could have been effective, out of that number, on 1 to 5, you might have had some damage to as many as 800 tanks or 1 to 10 to 400 tanks, which could show that at least in 20 to 1--on 4000 TOWs it would appear that they could have had some type of effect relative to the Iraqi tank corps.

"Was that worst case considered?

"Mr. POINDEXTER. Yes, sir. I think that the worst case was indeed considered and it was our judgment that it would not have a decisive impact. Also I should point out that the United States is obviously not the only country in the world that has supplied arms to Iran. Iran has been able to carry on the war with Iraq for a very long period of time. And so to some extent if they hadn't had obtained the weapons from us, they would have obtained them elsewhere. Obtaining them from us this way we felt gave us some influence at least within some elements of the government to have an impact."

repair parts, replacement parts, there were 234 line items that were listed, and of that there were something like 15 of the parts would have been a total 100 percent depletion of our U.S. inventories, in excess of 50 percent depletion for 11 repair parts, and less than 50 percent, but still enough to be classified as significant depletion, for 20 parts.

"Now, at the time that the decision was made relative to the supplying of the Hawk parts, was any consideration given as to the effect on readiness of the U.S. at that particular time?

"Mr. POINDEXTER. I don't believe so, Senator. On the other hand, Secretary of Defense Weinberger did not raise that issue with me or the President as that it was a problem that he was concerned about."

"Secretary WEINBERGER. Well, having, as I said before, when--having been given the basic instruction to limit it only to the bare minimum of people who needed to know to carry out the President's orders, I carried out that request and it was perfectly possible to do this without involving the Joint Chiefs and without involving

really anyone else except the people with direct physical custody over the weapons concerned.

"Mr. ASPIN. Did anybody suggest, either you or somebody else, that maybe we ought to get the military assessment here of this?

"Secretary WEINBERGER. We had discussions of what would be the effect in the Iran-Iraq war. The President was concerned with that. But the informal assessments, the idea that this was a very tiny fraction of what Iran was getting--bear in mind, to keep this in perspective, that Iran buys--has bought about \$10 million [sic] worth of armaments over the past few years all over the world.

"This was a sale of approximately 10 or 11 million [sic] and just on that size, it was clear that it wasn't going to make any major difference in the balance between the parties.

"Mr. ASPIN. So this was a judgment essentially made by the people involved on their own without asking for a formal--just a judgment--

"Secretary WEINBERGER. Again, it stemmed, I think, from this idea that the lives of the hostages and others could be endangered, that the idea was to keep the circle of people familiar with it to a very small circumference based on the need to know to carry out the President's orders and that was accomplished.

"Mr. ASPIN. Let me tell you three things that I think you might have asked the military to judge on this thing.

"One would have been the effect of these sales . . . or the transfer of arms to the CIA and then

Most of the answers to this, Mr. Aspin, with respect to our own readiness, I think we had somewhere in the neighborhood of 146,000 or 142,000 TOWs. Two thousand transferred would be 1.5 percent of our total stock of an obsolete weapon[] that we were no longer using and using only in training and in maneuvers.</p> <p>"On the Iran-Iraq war I thought we had covered that, that we thought it would have a very small effect in view of the correlation of forces with respect to tanks.</p> <p>"As far as our ability to fight Iran should we have to do that, we have, as I have said, and I can't go into more detail here, have considerable knowledge of ways to deal with anybody who had the TOWs.</p> <p>"Mr. ASPIN. Is that a note from Don Gregg? "A. That's Don handwriting. That's his note. "Q. Now, this pertains to the same visit to Central America during which you saw Felix Rodriguez in January 1986, right? "A. Correct. "Q. And the memo responds to questions raised [redacted] as to whether it was legal for you to visit FDN locations in [redacted]. "A. That's correct. "Q. While you were in [redacted] did you come to learn about any of the resupply operations that were then in progress for the contras, January 1986? "A. Yes, I did. I visited the [redacted] airfield in [redacted.] When I visited it, it was described to me as the base for the FDN, Nicaraguan Democratic Force, military force, the base from which they conducted their resupply operations. "Q. And who did you understand was involved in those resupply operations, based on what you learned in Central America? "A. My understanding was that the FDN, a colonel, I believe his name was [redacted,] an FDN colonel, a contra colonel, was running that operation out of [redacted.]

THE IRAN INITIATIVE: WHITE HOUSE MEETING
SPORKIN ACCOUNT:

Sporkin attends a meeting at the White House on the Martin Luther King holiday. Clair George, Secord, North and the CIA Deputy Chief of the Near East also attend. Poindexter is not present.

North conducts the meeting and they discuss an upcoming meeting in London. Sporkin, who does not see a signed Finding during the meeting, says little and is disturbed by Secord's presence. He makes two points: the CIA should have the money for the weapons in hand before any weapons are

I'll stand by. For what it's worth, I think it is likely that the Israelis are sucking us in o[n] the arms transfers and consequently it might be worthwhile to just go back and turn off this latest ploy, which started as if it would involve them taking all the risks but has become more complicated. It seems to me that they still need us more than we need them for the bigger prize and that it might well be worthwhile to go back to that priority. It might at least get them to fish or cut bait on the hostage deal. And if they say nix to any [redacted] meeting until we resolve the hostage return, then we will know we are being conned and well rid of them on both counts. But my guess is that they will do the hostage deal on their own if we stonewall. It holds a lot of long term leverage for them, or at least [copy ends]."</p> <p>(McFarlane PROF to Poindexter "[Redacted] Meeting," 1/21/86 23:25:20, Reply to note of 01/17/86 09:50 [one of the PROFs recovered during the "hex dump" of White House computers in 12/87 for any messages missed during earlier searches of those computers; see also 86/01/22-010</p>

22-23, 1986			<p>Attending: North, Secord, Nir, and Ghorbanifar. Ghorbanifar says he is owed \$5.4 million from the November I-HAWK transaction. Secord learns later that the money is returned.</p> <p>Out of Ghorbanifar's presence, Nir demands that the U.S. furnish Israel with 508 replacement TOWs without Israel's paying; "and so it was decided that sufficient monies would be collected in the sale of these 4,000 TOWs to enable [Secord] to purchase 4,508 TOWs." They discuss, as well, "that [the U.S.] would have to get from Iran some sort of plan on how we were to proceed with the initiative . . . to achieve a high-level government-to-government meeting with Iranian officials." Secord gives Nir the Lake Resources account number and address. They all agree to meet again on Feb. 6 in London; Ghorbanifar fails to appear at that meeting, however. THE NOTIONAL TIME LINE

REGAN ACCOUNT:

"Mr. COHEN. Did you ever see the so-called notional time line that was submitted by Lieutenant Colonel North on January 24th, 1986?

"Mr. REGAN. The what?

"Mr. COHEN. The so-called notional time line.

"Colonel North put together a notional time line on which he suggested that the Ayatollah Khomeini would retire on February 11.

"Mr. REGAN. No, I never saw that.

"Mr. COHEN. The release of 50 Shiite prisoners, the release of British and Italian hostages.

"Mr. REGAN. No, I never saw that.

"Mr. COHEN. Would that have made a difference, that the arrangement was being added or burdened with those additional factors?

"Mr. REGAN. I don't think so. I don't think you could be that precise.

"The state of our knowledge of what the Ayatollah was doing was then--as far as I know, still is--very imprecise. I don't know how anyone could have predicted that.

"Mr. COHEN. The only point I'm making is these so-called notional time matters were not disclosed to you or to the President, so far as you know?

"Mr. REGAN. Not to my knowledge.

"Mr. COHEN. And John Poindexter never indicated to you the price was going to be inflated some three or four hundred percent, not counting Mr. Ghorbanifar?

Mr. REGAN. No."

Everyone here at Headquarters advises against this operation not only because we feel the principal involved is a liar and has a record of deceit, but, secondly, we would be aiding and abetting the wrong people. I met with Poindexter this afternoon to appeal his direction that we provide this intelligence, pointing out not only the fragility in the ability of the principal to deliver, but also the fact that we were tilting in a direction which could cause the Iranians to have a successful offense against the Iraqis with cataclysmic results. I noted that providing defensive missiles was one thing but when we provide intelligence on the order of battle, we are giving the Iranians the wherewithal for offensive action.</p> <p>"4. Poindexter did not dispute our rationale or our analysis, but insisted that it was an opportunity that should be explored. And I am glad, Mr. Nields, that you are bringing this out because I don't think it has ever been brought out before, the context in which this occurred. Specifically, as I left the administration, there were two important changes which altered the authority of the administration to do things that under my own time in government, it could not do.

------	---------	---------	------

"Specifically, the two things were that there was a Finding by the President on the Iran business; the CIA under that Finding was put in charge of what amounted to a sale of U.S. weapons to third parties to Iran.

"Now, knowing that or learning that after the fact from Admiral Poindexter, the involvement of the CIA suggested to me that, as with any CIA operation, they would contract to someone, and it wouldn't surprise me if it was someone who had worked with the CIA as General Secord had, to do X, Y or Z under the Finding. That is an important difference. After I left, that could become the norm. But not while I was in government. So it wouldn't have surprised me to know of General Secord's participation in 1986.

"The second new condition that existed was that the administration was authorized to provide advice to the contras. Now, it is true that there is a line to be drawn between what constitutes legal and other advice, and I believe the language in the report foreclosed advising on tactical military operations but not on intelligence or where you should go to buy your arms or this kind of thing generically. So to learn of efforts or interest on the part of the contras in finding Blowpipes to something else would not have necessarily been out of bounds.

"But I do take your point. I think it crossed my mind certainly that it wasn't just a matter of Colonel North's advising them for them then to get on an airplane and go to London and buy a Blowpipe. Probably he was giving them more advice

I have no specific memory of it.</p> <p>"Mr. EGGLESTON. Page 2, the last sentence says . . . , 'The Secretary asked that I make you aware of the Army's concerns in the event you wish to advise the DCI['], which would be Mr. Casey[, ']or the Attorney General[']?</p> <p>"Secretary WEINBERGER. That would indicate that he had discussed it with me, as I am sure he did.</p> <p>"Mr. EGGLESTON. Do you recall in the general time frame any discussion about delaying notification to Congress?</p> <p>"Secretary WEINBERGER. In the discussions of the--that were in the Oval Office meeting, there were points made two or three times that while notification would be made, would have to be made to the Congress under any procedure, it was not necessary to make the notification contemporaneously with the event.</p> <p>"Mr. EGGLESTON. That was an opinion that the Attorney General was giving?</p> <p>"Secretary WEINBERGER. Yes, I believe so, and I think others made that point, too.</p> <p>"Mr. EGGLESTON. This memorandum at least is an indication from you to Admiral Poindexter that the Army at least was concerned that notification had not been given?</p> <p>"Secretary WEINBERGER. Yes, and we passed that on to Admiral Poindexter.</p>

CHRONOLOGY OF THE
JOINT HEARINGS ON THE IRAN-CONTRA INVESTIGATION (JHICI)

LONG-FORM VERSION

DATE	GENERAL	CONTRAS	IRAN
			<p>"Mr. EGGLESTON. Do you recall whether you received any response from Admiral Poindexter to this--</p> <p>"Secretary WEINBERGER. No, I don't. I don't have any memory that he responded.</p> <p>"Mr. EGGLESTON. Do you recall any discussion throughout this time period that now the time had come to notify Congress.</p> <p>"Secretary WEINBERGER. Not that we made. Our transfers to the CIA did not require notification. Everybody was agreed on that. They were in the normal course, so to speak, as long as they were under the Economy Act and reimburs[a]ble, and to the best of my knowledge, the conclusion was that kind of transfer did not require notification.</p> <p>"But there was discussion certainly at the January meeting, perhaps at the December meeting, that notifications would have to be given and this point that I have made that they could be done at later times.</p> <p>"Mr. EGGLESTON. But you don't recall any later time where the issue came up where there was a discussion that now that later time had arrived and it is time to notify Congress until November of 1986?</p> <p>"Secretary WEINBERGER. Until November, yes." (Weinberger Testim., JHICI, 7/31/87, at 129-31; JHICI Ex.
